### DEAR FRIENDS:

We wish to thank you for the thousands of orders placed with us last Spring. Even with a shortage of help and unfavorable Spring weather, we were able to get all orders shipped to our customers with very little delay. When mistakes occurred, we were pleased to make prompt adjustment.

We are sorry that it was impossible for us to accept all orders. Now, more than ever before, it pays to order early.

This year the supply of salable stock is again far below normal. To avoid disappointment, make your selection now and order promptly, while our supply is complete.

We sincerely appreciate the confidence placed in us and will do our utmost to always deliver the finest nursery stock that can be grown.

It is a pleasure for us to help you with your fruit growing and gardening problems. Letters from you are always most welcome.

Sincerely yours,

*William F. Kelly*

# Important Ordering Information

ORDER FROM KELLY'S WITH EASE AND SAFETY

## OUR REFERENCES

As to our responsibility and reliability, we refer you to the Merchants and Farmers National Bank, Dansville, N. Y.; Groveland State Bank, Groveland, N. Y.; Citizens Bank & Trust Co., Dansville, N. Y.; to any person whose letter appears in this catalog, or to your State Experiment Station or College.

## ORDER EARLY

As soon as this Catalog reaches you please send in your complete order with definite shipping instructions. We then set trees aside until desired shipping time. If you prefer, leave the time of shipment to us and trees will reach you at the best time for planting in your locality.

## PLANTING SEASON

Trees can be planted any time during their dormant period. We ship all Winter to Southern States, but our regular Spring shipping season opens about the first of March and continues well into June. Fall planting season begins about October 15th and extends until ground freezes solid.

## RIPENING DATES

With our descriptions of varieties, we've indicated the approximate ripening date at which fruit is ripe and ready to eat in Western New York. This date will vary with the season and in different sections of the East. The fruit may ripen a few days to a week earlier or later.

## SEND CASH WITH ORDER

It is our cash with order—direct from nursery to planter—method of doing business that enables us to sell trees of the highest quality at such extremely low prices. Make remittances by post office or express money order, bank draft or registered letter. To large buyers, when satisfactory reference is given, we will ship C.O.D. provided one fourth the amount of order is sent in cash when order is placed. We cannot accept orders for less than \$1.00.

## BOXING AND PACKING FREE

We make no charge for boxing or packing. Prices, except as noted, are F.O.B. Dansville. If you prefer to have us prepay shipping charges please add 7% to your order.

**This Catalog Cancels All Previous Price Lists**

## USE ORDER SHEET

Please make your order out on order sheet enclosed. To avoid mistakes and delay write letters on a separate sheet of paper. Please be sure order is sent in to us as you wish it filled. Making changes during our rush season adds to the confusion and makes mistakes easily possible.

## QUANTITY RATES

Take advantage of our lower rates for quantity purchases. For less than 10 trees remit at each rate; 10 to 50 trees of one sort such as Apples, varieties alike or assorted entitle you to the 10 rate. An order for 50 or more trees of one sort, varieties alike or assorted, entitles you to the low 100 rate.

## HOW TO PLANT

*With every order we will send absolutely free a book which, by word and picture, will show just how to plant a tree or shrub. The instructions are clear, and if followed, your plants should grow and thrive. We send the 16-page Revised Booklet FREE with your order acknowledgment.*

## NEARBY CUSTOMERS

For the convenience of customers within driving distance of Dansville we are open on Sundays during April and May from 8 A.M. to 5 P.M. In the Fall during October we are open the same hours.

# Kelly's 65 Year Old Reputation for Highest Quality Is Your Guarantee

## WE GROW THE TREES WE SELL

When you buy from us, you are dealing with a Concern that has been in Business 65 years. We are large growers and have under cultivation over 500 acres of land, using the most modern equipment. We are proud of our employees—men and women—who have made the Nursery Business their life work and who are devoted to the high standards of Kelly's Trees and Plants.

Therefore you can see that we are able to sell Nursery Stock that is expertly grown and handled—not plants that have been handled and exposed many times before you receive them.

We are determined to supply our customers the best Nursery Stock it is possible to produce—True-to-name, Free from Disease, and fully up to grade specified, at fair prices. You will accomplish much towards a successful crop when you plant our Nursery Stock. Ask any leading fruit growers in your locality about Kelly Trees.

Visitors are always welcome at our Nurseries and we consider it a privilege to have you call on us.

## POLLINATION OF FRUIT TREES

The value of pollination in the production of a fruit crop is now recognized. Although many varieties are self fruitful and thus require no pollination from another variety, experiments show they are greatly benefited by cross pollination. Necessarily because of the lack of space available, we are only able to give brief notes on this important topic. For more detailed information, we suggest that you write to your State College or Experiment Station, the address of which you will find on page 16-B. If you do not care to give attention to this detail, just write, stating the number of trees you wish to plant, and we will be pleased to be of service and suggest the best combinations.

### Our Guarantee

(1) WE GUARANTEE delivery to customer in first-class condition of all nursery stock. If, through delay or mishandling in transit, nursery stock is not in first-class condition on arrival and satisfactory to you, notify us immediately and we will make prompt, satisfactory adjustment. Have your express agent (using Form 679) or postmaster sign the damage statement which you mail to us.

(2) WE GUARANTEE our nursery stock to be true-to-name. We strive to avoid mistakes but should any stock prove untrue to name as sold, we agree to replace such stock or refund purchase price.

(3) WE GUARANTEE to deliver well-grown trees and plants, which, if properly handled and planted, will grow. However, if, due to unfavorable weather, such as drought, excess rainfall, or other conditions over which we have no control, they fail to grow, we will replace at half price, the following season—you to notify us not later than July 15th. We appreciate your business, want you well-pleased in your dealings with us, and look forward to a continuance of this pleasant relationship. Our success depends on your patronage. If you are not fully satisfied, please write us.

ALIKE OR ASSORTED VARIETIES

### Red Delicious

#### TENDER—CRISP. KING OF ALL RED APPLES

A large, dark red Apple, with crisp, fine grained flesh of excellent quality and flavor. A splendid keeper and shipper. Tree one of the hardiest. A vigorous grower with good foliage. A regular annual bearer. Excellent for eating, and the most popular fruit stand Apple. Packs well in boxes and bushels, always bringing high prices on the leading markets and in strong demand by the best trade.

December-March

Red  
Delicious

*Macoun...* A late McIntosh type Apple ripening about 10 days later than McIntosh. Dark red with whitish close grained flesh. Fine quality.

A heavy and regular bearer. Introduced and recommended by the New York State Experiment Station.

November

### Stayman's Winesap

Tree moderately vigorous, comes into bearing young and a reliable cropper. Medium to large size fruit, slightly striped, coloring to dull red. December-March.

### Red Spy

A new red sport identical with Northern Spy except that the fruit is a solid bright red without either stripe or splashes. Much handsomer than its parent. An excellent commercial sort. Tree is hardy and productive. November-April

Macoun

Winesap

Red Spy

# Apples...

## Cortland

A comparatively new Apple of the McIntosh type that combines the high quality and flavor of the McIntosh, the ability to stand handling of the Baldwin and tendency to hang to the tree of the Ben Davis. Should be planted extensively. An excellent variety to plant with McIntosh as a cross pollinator. The fruit of Cortland is as large or larger than that of McIntosh, round to somewhat conical in shape. In color it is a bright red, blushed with darker red, splashed and striped with carmine and more or less overlaid with a deep purplish bloom. *October-February*

Cortland

## McIntosh Red

### (SOLID RED STRAIN)

Without doubt the leading commercial variety of New York and the New England States. A very attractive red Apple of the highest quality. Hardy, bears young and annually. Flesh white, fine, very tender, juicy, and refreshing with attractive flavor. It is especially desirable for fancy trade. *October-January.*

Solid Red McIntosh

Yellow Delicious

## Yellow Delicious

A bright golden yellow Apple of excellent quality. Firm, crisp, and very juicy. Splendid keeper. Bears young and heavily. Many growers say this is the finest yellow Apple. *October to April*

### STATEMENT OF INSPECTION FOR TRUENESS-TO-NAME

Amherst, Mass.  
August 16, 1944

#### To Whom It May Concern;

This is to state that all of the salable apple, sweet cherry, 1- and 2-year pear, and 1- and 2-year plum stock now growing in Kelly Brothers' Nurseries, Dansville, New York, have been examined for trueness-to-name by A. P. French, O. C. Roberts, and L. Southwick

To the best of our knowledge and belief, these trees are true to name as they now stand in the nursery row. The salable peach trees in this nursery were also examined and any mixtures observed were rectified. While it is impossible to positively identify all peach varieties in the nursery row, it is possible to eliminate a high percentage of the mixtures.

J. K. Shaw  
Research Professor of Pomology

## Grow CRAB APPLES

FOR FRUIT AND ORNAMENTAL EFFECT

### HYSLOP

Fruit large, very brilliantly colored, dark red or purplish overspread with thick, blue bloom, borne in attractive clusters. The tree is a good grower, very hardy, and a reliable cropper yielding good crops biennially or in some cases annually. It is desirable both for home use and for market. One of the best known and most widely propagated varieties. *September 15-25th*

### DOLGO CRAB

A handsome red Crab Apple. Vigorous and productive. Very juicy, jellies easily, and makes a rich, ruby red jelly of beautiful color and excellent flavor. Makes exceptionally good cider. *September 1-10th.*

Prices same as on Standard Apple Trees

Hyslop

# KELLY'S *Inspected* APPLE TREES

## Summer VARIETIES

Whether you have room for only a few trees in your backyard, or plan to plant a large orchard . . . you'll get best results with **Kelly's Apples**.

We say this with confidence, because **our trees are grown under the most exacting conditions for your protection!** Starting with a whole root seedling our trees are propagated by the budding method . . . the best and most expensive way. Each year we go direct to commercial bearing orchards, to cut our bud wood from trees that show the best color, and bearing qualities.

This is what gives **Kelly's Trees** the good foundation that assures you of permanent, healthy growth, disease-free trees and heavy crops year after year. We recommend the following varieties as most profitable to the planter.

*Months listed after description indicate the time at which the fruit is at its best for general use*

**EARLY HARVEST.** An old variety still holding its popularity because of its size and early bearing qualities. Fruit is pale yellow, tender, very good in quality and fine flavor. Desirable variety for home orchard because of its culinary uses. *August 1st-5th.*

**LODI.** A new fruit that closely resembles one of its parents, Yellow Transparent, but the fruits are larger and ripen a little later. An annual bearer that is becoming a commercial variety. Tends to bear young. *August 10th-15th.*

**RED ASTRACHAN.** One of the best of the Summer varieties as it becomes fully ripe and ready for home use from late July to September. Fruit very handsome, large, round, nearly covered with deep crimson overspread with thick bloom; juicy and good though rather acid. Tree medium size, yielding good crops. *August 2nd-6th.*

**RED DUCHESS.** A solid red strain of the Old Duchess of Oldenburg. One of the hardiest varieties grown. Fruit is large-striped red in color. A good early eating Apple. Vigorous grower, regular and prolific bearer. *August 5th-10th.*

**SWEET BOUGH.** Large pale yellow, sweet, tender and juicy. Delicious for baking. Tree a compact grower and abundant bearer. Under favorable conditions is long lived; one of the best early sweet Apples. Should be in every collection. *August 12th-18th.*

### YELLOW TRANSPARENT.

Fruit of good size; skin clear white turning to pale yellow; flavor acid and very good making it excellent for cooking. Begins to ripen sometime in July and continues for 3 or 4 weeks. Tree upright and a very early and abundant bearer. *August 3rd-7th.*

### POLLINATION

Varieties such as McIntosh, R. I. Greening, Red Gravenstein and Northern Spy set little fruit without the assistance of an efficient pollinator. Good varieties to use for pollination are Cortland, Wealthy, Delicious, and Macoun. It is always best to plant 2 or more varieties to take care of this problem.

## Prices on KELLY'S INSPECTED APPLE TREES

## Autumn VARIETIES

*Descriptions indicate approximate date at which fruit ripens in Western New York*

**FALL PIPPIN.** Very large and when fully ripe has an attractive yellow color. The flesh is tender, rich and very good in quality, being excellent for dessert and especially desirable for culinary purposes. Does not ripen uniformly, part of crop being fully ripe and ready to use while balance will be still hard and green. Trees hardy and productive. *September 15th-25th.*

### Early McIntosh

For home orchard or commercial use this is the ideal early variety to plant. Resembles its McIntosh parent with its handsome red color and uniform round shape. The tree is a vigorous grower, hardy and productive. It is an annual bearer and early thinning is recommended. Under favorable conditions of growth it comes into bearing at an early age. Besides pleasing the taste, this early Apple pleases the eye. The flesh is white, tender and juicy with fine flavor. Ideal dessert Apple. *August 15th-25th.*

Lodi

Early McIntosh

Milton

## AUTUMN VARIETIES—Continued

**MILTON.** A handsome new Apple of the McIntosh type, but ripens a month earlier, about the time of Wealthy. Bright pinkish red, large, flesh tender, very white with a refreshing aroma. An early and annual bearer; excellent for home and roadside markets.

**RED GRAVENSTEIN.** New red sport much more attractive than its parent; differs from old Gravenstein only in solid dark red color of fruit; should be planted in place of Gravenstein. *September 10th-15th*

**WEALTHY.** Beautiful moderate sized brilliant red Apple, fine quality, one of the best of its season; is relatively a good keeper. Owing to hardiness of tree, its adaptability to cold climates and early bearing habits, can be profitably planted as a filler. *September 15th-20th.*

Red  
Gravenstein

## Winter VARIETIES

*Months listed after descriptions indicate the time at which the fruit is at its best for general use*

**BALDWIN.** Long a favorite with commercial orchardists for which no substitute has yet been found. Yields large crops and is an excellent shipper. Highly regarded as an eating and cooking Apple, having a flavor all its own. Fruit is large, bright red, crisp, juicy, and rich. Tree vigorous and productive. *December-March.*

**CORTLAND** (See page 5 for description and illustration).

**DOUBLE RED DELICIOUS.** A very fine colored, solid red strain of Delicious resembling its parent in all characteristics except color. *November-March.*

**DELICIOUS, RED** (See page 4 for description).

**FAMEUSE (Snow Apple).** Is one of the most desirable dessert Apples of its season. Beautiful in appearance, being deep crimson, flesh is snowy white, tender, melting and delicious. Well known in markets and during its season, October to the holidays usually sells above average market prices. Tree is medium size, hardy, rather long lived and a reliable cropper. *October-December.*

**GOLDEN RUSSET.** A good commercial variety, ranking second only to Roxbury. Keeps well. Attractive, yellow russeted Apple. Desirable for home use during Spring months before small fruits ripen. Excellent for cider. Tree is hardy. *November-April.*

**GRIMES GOLDEN.** An Apple of fine quality. Fruit medium to large, bright yellow flesh. Juicy and fine flavored. Tree vigorous grower, hardy and productive. *November-February.*

**JONATHAN.** A very beautiful Apple, of a brilliant red color, highly flavored and of excellent quality for dessert or culinary use. Good family sort as well as highly profitable for market. Tree generally bears early, productive and long lived. *November-April.*

Ringoes, New Jersey  
November 6, 1944

It is a pleasure to do business with a company such as yours, and I can assure you that my friends will hear about your service and excellent manner of doing business, and I myself am looking forward to placing another order sometime in the near future.

Very truly yours,  
MICHAEL GELLNER

Rome  
Beauty

## WINTER VARIETIES—Continued

**KENDALL.** New McIntosh seedling introduced and recommended by New York State Experiment Station. Handsomely colored solid dark red, fruit large, fine grained whitish flesh; excellent quality and flavor. Ripens about the same time as McIntosh but keeps longer.

**KING (Tompkins County).** Fruit is one of the largest Winter Apples, beautiful red color with enough contrasting yellow to make an attractive appearance. Demand for it comes in late Fall and early Winter. *November-March.*

**LADY (Christmas Apple).** Strikingly beautiful little Apple especially suitable for decorative use and for dessert. Brings high prices in New York City markets. Trees prefer sandy or gravelly loam. Fruit is small, uniform in size and shape. Color deep red blush with pale yellow ground color. *December-January.*

**MACOUN** (See page 4 for description and illustration).

**MCINTOSH RED** (See page 5 for description).

**NORTHERN SPY.** Easily ranks among the very best Winter Apples. A leading commercial variety, well known, having a well established reputation on the market. Fruit is large, very attractive, being of bright red color with a pronounced bloom. Flesh is juicy, crisp and excellent for dessert or culinary purposes. Brings high prices on the market. Keeps well in storage until April or later. *November-April.*

**ORLEANS.** Striped to solid dark red, attractive, larger, later and more sprightly than Delicious which it resembles; tree notably hardy; ripens with Delicious but keeps longer in storage; bears early, annually and heavily; is resistant to scab. *December-March.*

**RED ROME.** A new sport of Rome Beauty and like Gallia Beauty is identical with its parent in all characteristics except fruit is a solid red color. *December-May.*

**RED SPY** (See illustration and description on page 4).

**ROME BEAUTY.** Yellow and red striped Apple of excellent quality. Prolific annual bearer. Early bearer and good keeper. Profitable commercial sort for New York, Ohio, Pennsylvania and West Virginia. *December-May.*

**RHODE ISLAND GREENING.** A large and superior Winter Apple that is famous over a large extent of country. As a cooking Apple it is unsurpassed, and as a dessert fruit of its season, has few equals. It is a good keeper, but keeps better if picked early. This Greening is a beautiful yellow color when ripe, and an abundant yielder. Tree is long-lived, hardy and does well on fertile, gravelly or sandy loam with well-drained clay subsoil. *December-April.*

**STAYMAN'S WINESAP** (See page 4 for description and illustration).

**SWEET DELICIOUS.** The best sweet Apple to grow; attractive dark red, large excellent quality with the aroma of Delicious mingled with its honeyed sweetness. An annual bearer; keeps well throughout the Winter. Recommended for a dessert and baking variety. *December-April.*

**TOLMAN SWEET.** Fruit is generally esteemed for certain culinary purposes and baking. Yellow tinged with red. Very sweet, hardy and productive. *November-April.*

**YELLOW DELICIOUS** (See illustration and description, page 5)

# Kelly's Cherries

## Sturdy-Upland grown Trees

### Large Montmorency

**The nation's most popular SOUR Cherry**, always in demand by the home canner as well as the canning factories, where they are canned by hundreds of tons. The trees are good bearers and the fruit ships well and appeals to the human eye for color as it is a bright clear red. Is good sized and has a fine flavor. Can be eaten right off the tree and makes excellent pies and other desserts. A variety that is hard to beat from any angle. *Ripens about July 15th.*

(See Pages 16A to 16G for Helpful Cultural Information)

**POLLINATION**—Sweet Cherries are self-unfruitful, so two or more varieties must be planted. Where Napoleon, Bing, and Lambert are to be planted together, another variety such as Windsor or Black Tartarian must be added as the first three will not pollinate each other. The Sour varieties are self-fruitful.

### Hansen Improved Bush Cherry

An ornamental shrub, producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning red in Autumn. Attractive white blossoms add to landscape effect. Dwarf-growing 4-5 feet tall. Can be kept trimmed. Best to plant 2 or more bushes for better fruit production.

**3 Year, Bearing Size, 85c. each, 2 for \$1.50**

#### EARLY RICHMOND

Fruit small but good and the earliest of the Sours. Unsurpassed for cooking purposes. This is the variety that yields such marvelous crops in the home gardens. **Most hardy of all varieties**, uninjured by the coldest Winters. Tree slender in growth, with a roundish, spreading habit. *Ripens June 25-30.*

#### ENGLISH MORELLO

Fruit is handsome in appearance, real tart. Is recognized as **the standard late Sour Cherry**, taking the place of Montmorency after its season is over. Cooking gives the fruit a rich, dark wine color, very attractive in appearance and a pleasant, aromatic flavor. Tree is small, upright spreading with drooping branches. *Ripens July 20-30.*

## Windsor

One of the best quality dark Cherries, often referred to as Black Oxheart. Has pinkish flesh and almost black skin. Large, juicy and firm. Delicious to eat, fresh and **wonderful for canning**. Used extensively for fancy preserving. Tree grows upright and is a rapid and vigorous grower. A good commercial variety. *Ripening date July 20th to 26th.*

### BLACK GIANT

One of the newer varieties introduced by Burbank. Fruit is one of the largest and best of the purplish black sorts, flesh firm, sweet and richly flavored. Ripens late and keeps well on the trees and after picked. Trees hardy. An excellent variety to plant. *Ripening date, July 14th-18th.*

### EMPEROR FRANCIS THE QUEEN OF ALL SWEET CHERRIES

Recognized as one of the newer leading Sweet Cherries for home and commercial orchards. This high quality Cherry resembles Napoleon in size and color except that it becomes a little darker. *Ripens around July 4th.* Sold at same prices as regular varieties.

### BLACK TARTARIAN

Well known and popular Sweet Cherry. Very large, bright purplish black, juicy, and has a rich flavor.

Excellent for canning and a good shipper. Trees are remarkably vigorous and erect growers, produce immense crops. *Ripening date June 30th-July 4th.*

### LAMBERT

Follows Black Giant closely in season, largest and best of the late purplish red, firm fleshed varieties. Rich flavored, produces an enormous crop every year. Sells at good prices on the market after other varieties are gone. Excellent shipper. *Ripening date July 18th-25th.*

### NAPOLEON (Royal Ann)

This is a choice sweet Yellow Cherry of the highest quality known as the White Oxheart. Good for market and canning. Pale yellow with attractive bright red cheek; flesh firm, flavor rich and sweet. Fruit keeps well so fruit dealers like it for the market. Trees productive and come into bearing early. *Ripening date, July 7th-10th.*

### SCHMIDT'S BIGGAREAU

A midseason black Sweet Cherry. **Considered one of the best large varieties of its season.** Delicious to eat, fresh and canned and very attractive. Fruit grows in clusters. Keeps well and is an excellent shipper. In size it is usually unsurpassed by any black Cherry in the East. *Ripens around July 10th.*

Many people often ask which varieties we would suggest for planting. We highly recommend **Windsor, Emperor Francis, Napoleon and Schmidt's Biggareau.** Each one pollinates the other—any combination of two or more gives desired results.

Dates after each description indicate approximate picking dates in Western New York. Months indicate time at which fruit is ripe and suitable for home consumption.

## BARTLETT

There's hardly a person that doesn't know the Bartlett Pear and its qualities, as it is grown in, and is adaptable to all different climates, soils and situations. Fruit is large, golden yellow in color with a reddish blush on the sunny side. Flesh is tender and juicy, with a delicious musky aroma. Trees are vigorous, attain large size, bear young, live long, and barring frosts or freezes, they bear full crops year after year. Justly the leading commercial Pear—a leader among canning Pears. *Sept.-Oct. (Sept. 1st-10th)*

**ANJOU.** This is one of the best late Fall and early Winter varieties for the market, its season lasting until way into January, even in common storage. Large fruit, green in color, but turning to yellow when ripe, dotted with russet. The yellowish-white flesh is firm but tender, very juicy, sweet, spicy, with a rich vinous flavor. Trees hardy and vigorous growers, come into bearing early. Of all Winter Pears, none is more valuable for commercial or home orchards. *Oct. to Jan. (Sept. 25th)*

**CAYUGA.** A seedling of Seckel which it resembles in shape, but is as large as a Bartlett and colored greenish yellow with a dull blush. It has the flavor of Seckel, although milder and not quite so spicy. Prolongs the season of Seckel. *Sept. and Oct. (Sept. 15th-20th)*

## CLAPP'S FAVORITE

Precedes Bartlett, which it resembles in size, shape, color and flavor. In sections where Pears are grown for the market, it is the first Pear to be put on the market. Large, pale, lemon-yellow fruit with brown dots; fine texture, juicy, buttery, with a rich, sweet delicate vinous flavor. Tree hardy and productive. Thrives where other varieties fail. *August. (Aug. 15th-20th)*

**DUCHESS D'ANGOULEME.** The fruits excite admiration and wonder by their enormous size. Always known by this character. A dull greenish yellow spotted russet. If grown under favorable conditions the flesh is buttery and melting with a rich and delicious flavor. Trees are vigorous hardy and healthy, bear abundantly under the right conditions. Is a particularly desirable sort for the Pear fancier. *Nov. to Dec. (Sept. 25th-30th)*

**GORHAM.** A seedling of Bartlett and closely resembles its parent in all characters and ripens from three weeks to a month later. It rivals Bartlett in all good qualities, being as large and handsome and as good or better to eat or to can. Flavor is sweet and vinous with a very marked and pleasing aroma. The tree is notably resistant to blight. *Sept. to Nov. (Sept. 10th-25th)*

**KIEFFER.** Large fruit, rich yellow in color with red cheek. Very juicy. Good for canning which brings out its flavor. Trees vigorous, fruitful and are least susceptible to blight. *Nov. to Feb. (Oct. 1st-10th)*

**SECKEL.** The Pear to plant for eating fresh and for sweet pickles. Medium size, skin rich yellowish brown with deep brownish red cheek, when fully ripe. Flesh very fine grained, juicy, sweet and good. One of the best and richest flavored Pears known. Trees resistant to blight, very productive and hardy. Should be planted in fertile soils, not heavy clay. *Sept. and Oct. (Sept. 20th-25th)*

**SHELDON.** The fruits please both the eye and palate. In color it is distinctive in its russeted skin with a ruddy cheek. Flesh is melting and juicy and deserves to be called luscious. Flavor is sweet, vinous and highly perfumed. Keeps well and ships well. Very good for culinary purposes. Trees are large vigorous and hardy. *Oct. (Sept. 20th)*

## BEURRE BOSC

A Pear which is rated by all as "very good" or "best." Has a long tapering neck and a long stem which allows it to sway in heavy winds without dropping. Brownish yellow in color. Flesh is tender, buttery, very juicy, with a rich flavor and pleasing aroma. The tree is a slow grower, but most productive. *to January. (Sept. 1st-10th)*

# PLUMS

## PRICES ON PLUM TREES

|   | 1-9<br>trees<br>Each | 10- 25<br>trees<br>Each | 25 or more<br>trees<br>Each |
|---|----------------------|-------------------------|-----------------------------|
| 2 Year, 5-6 feet, 11/16 in. diameter..... | \$2.00               | \$1.70                  | \$1.25                      |
| 2 Year, 4-5 feet, 9/16 in. diameter.....  | 1.75                 | 1.50                    | 1.10                        |
| 2 Year, 3-4 feet, 7/16 in. diameter.....  | 1.50                 | 1.30                    | .95                         |

We must limit the sale to ten trees of any one variety to a customer, because of the shortage of trees. We can quote on quantity lots, especially on Prune in one year trees, for delivery this Fall 1945.

Dates indicate approximate ripening time.

## European Varieties

**ALBION.** The fruit is large, oval shape, purplish black with delicate bloom. Flesh is golden yellow, firm, juicy, pleasantly flavored and of good quality. Tree is vigorous and productive. A good shipper. The latest good Plum to ripen. *Last week in September.*

**FELLEMBERG PRUNE.** Widely known and valuable Plum for dessert, but most esteemed for market and drying or preserving. Fruit is long, oval, purple with a thick bloom; flesh firm, sweet and pleasant, separating freely from stone; moderate growth. A great favorite and there is always a good market for them at profitable prices. *Sept. 24th-26th.*

### LOMBARD

This variety is well known by all. Medium to large, roundish, dark red. Flesh yellow and juicy; very attractive. Very good canned, preserved or spiced. Ripens early. Is used in canneries and planted in home orchards where a hardy variety is needed. Trees medium size, very hardy, prolific bearers. *Sept. 18th-22nd.*

**MONARCH.** Large fruit with a rich purple color. Juicy, golden green flesh. A good variety for market. Bears early and abundantly. *Sept. 18th-22nd.*

### REINE CLAUDE

(BAVAY'S GREEN GAGE)

This variety is unsurpassed for gratifying the taste, richness of flavor, abundance of juice and pleasant aroma. Has beautiful fruit, large, pale yellow, marked with red if the crop is thinned and sufficiently exposed to the sun. Trees attain only moderate size in the orchard, are productive and bear regularly. Deserves a place in the home orchard. *Sept. 25th-30th.*

**SHROPSHIRE DAMSON.** Fruit is medium size, dark purple, produced in thick clusters. Good to eat out of hand when fully ripe or after a light frost. One of the best of its kind for culinary purposes. Tree a good grower and very productive. *Sept. 24th-28th*

**YELLOW EGG.** Largest and handsomest of the yellow Plums. Golden Yellow covered with thick bloom. Trees do well on all but very light soils. Amateur or commercial fruit growers should consider planting some of this variety. *Sept. 22nd to 25th.*

**GERMAN PRUNE.** One of the oldest Prunes under cultivation and widely known for its culinary purposes, especially for canning. Fruit long, oval, purple with thick bloom; flesh firm, sweet and delicious. Excellent commercial sort. *Freestone. Sept. 18th-22nd.*

## NEW Stanley Prune

A STAR PERFORMER

The best for commercial planting or home use. Bears fruit in three years and ripens 10 days earlier than other varieties, exceptionally productive. Fruit large, deep bluish purple, firm and sweet; of excellent flavor. Introduced by the N. Y. State Experiment Station, and is becoming a valuable commercial variety. Bears annually. Midseason. *Sept. 20th-25th.* Same price as other Prune trees.

## ORIENTAL VARIETIES

**ABUNDANCE.** Trees are adaptable to wide range of soils and climates, and bear not only heavily but yearly. Fruit large, very early, amber turning to a rich, bright cherry. Flesh light yellow, very juicy and tender. *Freestone.* Good for canning. Should be picked when not quite ripe, as keeps better and taste develops better. *Aug. 15th-20th.*

### BURBANK

Ripens a week or more later than Abundance. Fruit very large, bright reddish purple. Meaty and quite firm. Should be picked before entirely ripe. Best color to fruit attained when thinned on the trees. Trees are low growing, flat topped with somewhat drooping branches. Productive and vigorous. Good shipper. Needs close pruning. *Aug. 25th-30th.*

**RED JUNE.** Real early variety ripening before Abundance. In color it is a mottled garnet red, overlaid with a delicate bloom. Flesh is light yellow in color, firm enough to transport well. Trees are large, vigorous, hardy and productive. *Aug. 1st-7th.*

**SANTA ROSA.** A very promising Oriental variety. Fruit is handsome dark reddish purple, large with very juicy red flesh of good quality; tree is large, vigorous and moderately productive. *Aug. 20th-26th.*

### POLLINATION

With the exception of the Prunes Fellemberg, German, Stanley, etc. which are self-fruitful, Plums should be interplanted to insure a set of fruit—European varieties for pollinating that class and Oriental sorts for those varieties.

Burbank Plum

Stanley Prune

# Kelly's

## Best for Quality,

Peaches can be grown on any soil that will produce the average yield of farm crops and are especially adapted to the lighter soils. Careful cultivation and intelligent pruning will work wonders in the production of Peaches. If properly cared for, the trees are sure to bring in a handsome return on your investment. As in other fruits it is imperative, however, that your trees are of the best stock. It is very important that wood growth on Peach trees is well ripened and that they have a good and sufficient quantity of fibrous roots, so they will withstand the hot sun and drought that may occur after planting.

Because of the shortage of trees we must limit the sale to ten trees of a variety except on Hale Haven, Golden Jubilee, and Elberta, where the limit is 50 trees of a variety to a customer.

We will be glad to quote on larger quantities for delivery this Fall, 1945 or Spring 1946.

*Dates after each description indicate approximate ripening season in Western New York. Season varies in different sections of the East, but this will give you an approximate idea when to expect the fruit to be ripe.*

### BELLE OF GEORGIA

Large, attractive, white-fleshed Peach. Red cheek. Hardy and productive. Freestone. *September 3rd-7th.*

### CRAWFORD'S EARLY

Large yellow Peach of the finest quality and flavor. Freestone. *September 6th-10th.*

### CRAWFORD'S LATE

One of the finest late varieties. Large, yellow, of excellent quality. Freestone. *September 25th-28th.*

### EARLY ELBERTA

An excellent new variety resembling Elberta very closely except a little rounder in shape and about 10 days earlier in ripening. Freestone. *September 6th-10th.*

### J. H. HALE

An extra large Peach, yellow overlaid with crimson. Flesh golden yellow, of delicious flavor. An excellent shipper. A fine commercial variety. Prolific when cross pollenized with some other variety. All of the varieties offered in this catalog are suitable for planting with Hale. Freestone. *September 17th-21st.*

## HALE HAVEN

Marvelous new Peach, a result of crossing the famous J. H. Hale with South Haven. A large, beautifully colored, yellow fleshed Peach, ripens approximately 10 days to 2 weeks ahead of Elberta. Perfect freestone, strong grower, good shipper, and a prolific heavy bearer. The tree is hardy and fruit is of the highest quality. Has extremely high color which is present several days before the fruit ripens, thus allowing early picking for distant shipments. Should be included in every planting. *September 1st-5th.*

## The Sensational GOLDEN JUBILEE

We recommend this New Jersey Experiment Station introduction. Comparatively new, but widely planted; is a real money maker. Quite hardy, resists excessive cold. Sure cropper, after severe Winters and heavy frosts. Golden Jubilee is without equal as an early, large, yellow freestone of highest quality. Flesh is yellow, tender, juicy, and sweet. Ideal for home use and roadside market sales. *August 20th-25th*

Golden Jubilee

# Peaches

## Flavor, Yield, Profit

|   | 1-9<br>Each | 10-49<br>Each | 50 or more<br>Each |
|---|-------------|---------------|--------------------|
| 1 Year, 3½-5 feet, 9/16 in. and up diam. .... | \$1.50      | \$1.20        | \$0.80             |
| 1 Year, 3-3½ feet, 7/16 in. ....              | 1.25        | 1.00          | .70                |
| 1 Year, 2-3 feet, 5/16 in. ....               | 1.10        | .95           | .60                |
| Assorted varieties if you wish                |             |               |                    |

### MARIGOLD

One of the newer early varieties. Yellow, excellent quality, semi-cling. Excellent for roadside markets. *August 12th-17th.*

### MIKADO

The most popular, very early yellow. Hardy, productive. Ripens about six weeks ahead of Elberta. Blossoms self-sterile, needs to be interplanted. *August 3rd-8th.*

### ORIOLE

A new early Peach of high quality. Fruit medium to large in size, yellow fleshed and a Freestone. Trees vigorous and productive. One of the hardiest varieties. *August 15th-20th.*

### ROCHESTER

An extra early Peach of the highest quality and most delicious flavor. Large yellow with attractive red blush. A very fine canner, prolific, and an early bearer. Freestone. *August 29th-September 3rd.*

## RED HAVEN

A new, desirable early Peach that has been thoroughly tested and found highly satisfactory. Introduced by the South Haven Experiment Station, it has the fine flavor of the South Haven and Hale-Haven. When other early Peaches are still green this Peach is a bright red and ready to ship before it is fully ripe. A Peach to plant for real profit.

Hardy, freestone, self-pollenizing and a prolific yielder. *August 20th-25th*

## Elberta THE MONEY MAKER

The leader of all Peaches and the greatest commercial variety on the market; 50% of the Peaches planted are Elberta. In all probability no Peach will succeed over so wide a range of territory as this kind. It will thrive where any Peach can be grown. A beautiful Peach of good quality, not only the best orchard variety but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore, a more uniform cropper. It is large, yellow, with red cheek, juicy, and high flavor; flesh yellow, freestone. Season medium early following quickly upon Early Crawford. *September 15th-20th.*

### SHIPPER'S LATE RED

A rather late variety that is fast becoming prominent. Ripens a few days after Elberta. Large yellow flesh, attractive, highly colored freestone Peach. Of J. H. Hale type. Ours is the true strain. Buds cut from checked bearing orchards.

### SOUTH HAVEN

Another excellent Peach, well worth planting. Golden yellow with red blush. Large, meaty and of delicious flavor. Prolific. Freestone. *August 25th-September 1st.*

### VALIANT

Large, yellow Freestone. Juicy, very good quality. Excellent producer and fine canner. Quite hardy in bud. An introduction from Canada. *August 28th-September 5th.*

### VEDETTE

Ripens a few days before Valiant, and three weeks before Elberta. Fruit is large, roundish oval, yellow fleshed, and a freestone. Superior quality and color. *August 25th-30th.*

### VETERAN

Large, round, yellow fleshed fruit. Freestone. Since it ripens a few days later than Valiant, it makes a desirable sort to follow that variety; very hardy. *August 30th-September 4th.*

### POLLINATION

With the exception of Mikado and J. H. Hale, all the varieties we offer are self-fruitful

### TRUE-TO-NAME

All Kelly Peach trees inspected by Dr. A. P. French and associates of Massachusetts State College. *See statement p. 5.*

# DWARF TREES

## FRUIT ON DWARF TREES LARGER THAN ON STANDARDS

The fruit produced by dwarf trees is the same color and quality as that produced by standard trees but may average larger in size. For those who enjoy working with plants, there is a source of much pleasure in dwarf fruit culture, watching the fruit take shape and ripen over the season. Be sure to plant more than one variety to insure pollination.

## DWARF APPLE TREES

### BUDED ON NEW MALLING ROOTSTOCK

Our Dwarf Apple Trees are budded on the New Malling dwarf rootstock introduced recently to this country by Dr. H. B. Tukey of the New York State Experiment Station. Now you can have several varieties growing in your yard because of the small space required. 15x15 is a recommended spacing.

**This year we offer trees budded on Malling I rootstock only—trees at maturity reach a height of 10 to 15 feet**

|                       |                     |                      |
|-----------------------|---------------------|----------------------|
| <b>CORTLAND</b>       | <b>RED McINTOSH</b> | <b>RED DELICIOUS</b> |
| <b>EARLY McINTOSH</b> |                     | <b>RED SPY</b>       |

**Select, 3-4 feet trees—each \$3.50, 2 for \$6.75**

### PLEASE NOTE

We have placed a limit of two Dwarf Apple trees to a customer as the supply is very limited and we wish as many of our friends as possible to enjoy these fine trees. We request the privilege of substituting an equally good variety should we be sold out of the varieties ordered.

Dwarf Apple Tree, Early McIntosh

Early Golden Apricot

## QUINCE TREES

### Need Little Room to Grow—and Their Tangy Fruits Will Fill Your Pantry Shelves

Its pre-eminence as a fruit for jellies and preserves makes the Quince a profitable tree for the fruit grower, the farmer, or any one having even a small garden. The Quince tree does not take much room on account of its dwarfish character. Any kind of good, rich soil will give good results. It can be grown in bush or tree form. Hardly any family's fruit supply for the Winter is complete without the Quince.

## WAYNE COUNTY ORANGE

A superior new variety introduced largely through our efforts. Fruit is large golden yellow and of excellent quality. Makes delicious jells. Ripens early in September. Grows 10-15 feet tall—produces abundantly.

### PRICES—Nicely Branched Trees

2-3 ft. size, \$1.50  
each, 2 for \$2.85  
3-4 ft. size, \$2.00  
each, 2 for \$3.85

Wayne County Orange Quince

## APRICOTS

*So Delicious for Jams and Sauces . . . Easy to Grow*

### MOORPARK

You'll like this attractive variety. Has the highest quality and finest flavor of all Apricots. Fruit is large, deep yellow with a red cheek. Grows to about the same size as a Peach tree. *Ripens mid-August.*

**IMPORTANT**—Apricots require cross-pollination, therefore it is necessary to set out two different varieties to insure a set of fruit

**SELECT TREES—3-4 feet, \$2.00 each, 2 for \$3.85**  
**Supply limited—order early**

### EARLY GOLDEN

Another freestone variety which possesses a fine flavor. Skin is smooth—fuzzless, and pale orange in color. Medium to large in size—makes an excellent variety to plant with Moorpark.

# Quick Bearing Fruit Trees

Customers in all sections of the country report wonderful success with our quick bearing fruit trees. Many of these trees have already produced fruit in the nursery row. Ideal for the Home Orchard where quick results are desired or for larger commercial plantings.

We guarantee them to be first-class in every way. All have been scientifically grown for three and four years. They have had the necessary root pruning to produce an abundance of fibrous roots.

These are not neglected overgrown trees usually offered by many nurseries. They are fine, carefully grown, true-to-name Kelly Trees, guaranteed to satisfy you. Clean, smooth, and healthy.

## We Offer the Following Varieties Only:

**APPLES:** McIntosh Red, Cortland, Kendall, Red Delicious, Red Spy, Stayman's Winesap.

Select 7-8 foot Trees, each **\$2.75** :: **5** (ASSORTED IF YOU WISH) **\$11.75**

**PEARS:** Bartlett, Beurre Bosc, Duchess, Seckel, Sheldon.

Select 7-8 ft. Trees, each **\$3.50** :: **3** assorted if you wish **\$10.00**

Black Walnut

Hazel Nut (Filbert)

English Walnuts

## NUT TREES

### HARDY BLACK WALNUT

This tree does well in fertile, well drained soil. Very hardy. Grows most anywhere in the country. Produces annually large crops of nuts containing rich, oily kernels of fine flavor. Useful in making desserts, nut breads and confections. Tree grows 40 to 60 feet high; is a fast grower, and is long lived.

**Large, 4-5 ft. trees—\$2.50 each**

### ENGLISH WALNUTS

A fine, lofty growing tree, producing large crops of thin shelled, delicious nuts. Makes a desirable shade tree. Not hardy in colder sections except where planted in a sheltered location.

**3 ft. trees—\$2.50 each**  
**Supply limited**

### HAZEL NUT (Filbert)

These plants grow to about the size of a Peach tree if kept trimmed to one stem. Can be grown in bush form if preferred, however, for best nut production they should be grown in tree form. Two varieties needed for pollination. Can be grown where Peaches do well.

**Strong, 3-4 ft. trees**  
**\$2.00 each, 2 for \$3.85**

**BARCELONA.** This is the leading commercial sort being planted in Oregon and Washington where it bears very large crops. One of the newer prolific varieties. Large nut of round type.

**DAVIANA.** Nut medium to large, roundish oblong, excellent quality and good bearer. Best variety to pollinate Barcelona.

**Quick Bearing Age Apple**  
George Johantgen (left) and James McNeil (right) lifelong nurserymen showing a Quick Bearing Age Apple Tree of early bearing size. The spade is a special type used in the nursery to dig individual trees.

## NEW AMERICAN MULBERRY

**The Fruit You Have Wanted—**  
**Ideal for Pies and Sauce**

This strong, vigorous growing tree produces large, sweet black fruits. Often 2 inches long. Fruit is glossy and begins ripening in July, continuing through August. Tree is hardy and a handsome grower. Provides plenty of shade. Grows 20 to 30 feet tall. Can be used as a decoy to get birds away from Cherries and other small fruits, because birds prefer Mulberry to any other fruit.

**Select, 3-5 ft. trees—\$1.50 each**

Butternut

## BUTTERNUT

A fast growing tree that produces within 2 or 3 years after planting. Nuts are large, with sweet, oily, nutritious kernels. Wonderful for nut cookies and cakes.

**2-3 ft. .... \$1.50 each**

# Raspberries

Prices, Unless Otherwise Noted  
1 Year Selected Plants — 10 for \$2.25,  
25 for \$4.10, 50 for \$7.10, 100 for \$12.25,  
500 for \$43.00

## SODUS PURPLE

Justly the leading purple Raspberry. Recently introduced and recommended by the New York State Experiment Station. The berries are very large, firm, medium purple in color, sprightly and good in quality.

**The plants are very vigorous, very productive, and hardy.** Sodus is more resistant to drought than the old Columbian and yields a good crop every year. It ripens shortly after Latham. We believe you will like this purple variety.

July 10th-12th

## Cumberland-BLACK

### STILL THE LEADING LATE BLACK-CAP

Produces large, jet black fruit, firm and of excellent quality. Starts to ripen in mid-season, continuing for several weeks. Fruit is large, plump, sweet and juicy with a true "black cap" flavor all its own. Free from seediness and crumbling and an ideal shipper. **The most popular of all black varieties wherever Black caps are grown.**

July 5th-10th

## Morrison

### A GIANT NEW BLACK RASPBERRY

This variety, which originated in Northern Ohio is highly praised by growers everywhere. Extremely large, shiny jet black berries of fine flavor and less seedy than other sorts; excellent for market and home use. The strong, vigorous vines are very productive and free from disease and very long lived. We recommend this variety without reservation to those who want the best Black Raspberry.

**2 year Plants—5 for \$1.35, 10 for \$2.45, 25 for \$5.15, 100 for \$15.50**

Sodus Purple Raspberry

Latham Raspberry

## Latham—THE LEADING

### RED RASPBERRY 10 CHOICE PLANTS \$2.25

The leading Red Raspberry in all parts of the country. Latham is free from insects and diseases and multiplies rapidly.

The berries are large, plump, juicy, free from seediness and full of delicious flavor. Very hardy; cold weather seems to have no effect on its bearing ability. Marvelous keeping quality makes Latham a favored shipping and freezing variety. Refer to the planting guide we send with each order for full planting and cultural directions. Fruit usually ripens July 1st-10th.

## WORLD'S LARGEST FARM MAGAZINE

Farm Journal and Farmer's Wife is published monthly; big issues; new timely features; fine pictures, beautiful colored covers. Brief, easy to read, 68 years old. Largest subscription list in the world, — over 2,500,000 copies monthly from Maine to California.

### *Something for the Whole Family*

For folks who live in the Country and love the Country. This fastest printed Month Ahead Magazine gets the important news to you first when valuable and useful.

**Farm Journal** section: Latest ideas in farm practice, equipment and machinery repairs, livestock, dairying, poultry, crops, orchard, garden, and everything about the farm. Will keep you up-to-date on post-war changes affecting your farming operations. Latest Washington news important to farmers.

**Farmer's Wife** section carries new practical ideas on home decorations, fashions, fancywork, health and beauty. Canning, foods recipes tested in our own Farm Kitchen. Features on country life. Farm Women's letters, etc. Fiction by nationally known authors.

**Youth** section: Latest 4-H Club and FFA news, answers to youths' problems, grooming, etiquette, parties, games, movies, sports, aviation, hobbies, success stories, money-making ideas, jokes, cartoons, etc.

**LATE AND IMPORTANT "LETTER" EVERY ISSUE; DIGESTS FUTURE TRENDS IN BUSINESS OF FARMING.**

Mail this Coupon today with remittance (at our risk), direct to Farm Journal and Farmer's Wife, Dept. C., Philadelphia 5, Pa.

# Answers to the 35 Questions

## MOST COMMONLY ASKED BY THE AVERAGE PERSON BUYING NURSERY STOCK.

Compiled by our staff in cooperation with Dr. H. B. Tukey of the Geneva, N. Y. Experiment Station. Please read before ordering or asking for information. If your question is not answered here, write on a sheet of paper separate from the order blank. Additional planting and cultural information is contained in the Planting Guide we send you free.

**1. Q. When is the best time to plant nursery stock?**

- A. Either Fall or Spring, though early Spring is preferred by many. Fall Delivery season starts about October 15th and extends through to severe freezing of the ground. Spring delivery season starts March 15th and extends to June 1st. In our modern cold storage, we can keep plants dormant until the latter date.

**2. Q. How long before my fruit trees will bear some fruit?**

- A. This depends on the variety, but on the average we have found the following to be quite true:

|                         | AFTER PLANTING |
|-------------------------|----------------|
| 2 yr. Apples            |                |
| Cortland Early McIntosh | 2-3 yrs.       |
| Red McIntosh            | 3-4 yrs.       |
| Northern Spy            | 5-7 yrs.       |
| 2 yr. Pears             | 3 yrs.         |
| 2 yr. Plums             | 2-3 yrs.       |
| 2 yr. Sour Cherry       | 2-3 yrs.       |
| 2 yr. Sweet Cherry      | 3-4 yrs.       |
| 2 yr. Quince            | 1-2 yrs.       |
| 1 yr. Peach             | 2-3 yrs.       |

**3. Q. If I plant Asparagus in the Spring (Example) 1945 when can I harvest the first crop?**

- A. You could cut some Asparagus in 1946, but the first big crop would be in 1947.

**4. Q. Can I grow Quinces and Apricots?**

- A. Generally speaking, Apricots, though not a commercial crop in the East, will grow where peaches do well. If you can grow cherries, Quinces will grow there.

**5. Q. What are Quick Bearing trees?**

- A. The Quick Bearing Trees we offer are large three- or four-year old trees whose roots were pruned when they were two-year old trees. The result is strong fibrous root system that insures successful transplanting and early fruiting.

**6. Q. Will you tell me how to spray my trees and what to use?**

- A. Recommendations vary for the different States or localities. Your State Experiment Station has a free bulletin on the subject. See list of Stations and addresses under Question 15. A general home orchard spray which Dr. Tukey has found successful in his own home orchard is as follows:

Mix the three following powdered materials:

|                 |        |
|-----------------|--------|
| Wettable Sulfur | 5 lbs. |
| Lead Arsenate   | 2 lbs. |
| Rotenone        | 3 lbs. |

TOTAL 10 lbs.

This amount is for mixing with 100 gallons of water. Accordingly for convenience put up in 10-lbs. lots in small paper bags or glass jars, and use a 1-pound lot with each 10 gallons of spray, or one-half this amount for 5 gallons of spray.

Make applications (1) Before Bloom, (2) After Bloom, (3) Memorial Day, (4) Fourth of July.

Effective on fruits and roses, including apples, cherries, peaches, pears and plums, and also on vegetables including tomatoes, potatoes, beans, cucumbers, and melons.

\*This is not "fool proof" but will do for the average home orchard.

**7. Q. Should I fertilize my trees or put manure in the holes at planting time?**

- A. Fertilizers are of no value until the roots are established and growing, thus being able to absorb the nutrients. Manure is best used as a mulch on top of the ground well back from the main stem. It may severely injure the tree, if placed directly in the tree hole. Wet peat moss or similar material mixed with the soil at planting time (1 part of peat moss to 4 parts of soil) makes an ideal combination for loosening up the soil.

**8. Q. What are Mazzard roots?**

- A. Mazzard is used to differentiate this type of root stock from Mahaleb. Briefly Mazzard is the wild sweet cherry, and produces a long-lived tree which grows larger than the Mahaleb and comes into bearing a little later, and is not so hardy. Mahaleb is the perfume cherry of Europe and produces a tree smaller, earlier fruiting and hardier. Mahaleb is the most commonly used rootstock.

We charge a premium for trees on Mazzard roots because they are more difficult to grow.

**9. Q. What varieties are best for me to plant?**

- A. All the varieties we list are tried and tested. Therefore, your choice is dependent on the type fruit you want and the ripening season desired. Your State College or Experiment Station will also be glad to supply recommendations for your particular section and soil condition.

**10. Q. How do I take care of my Boysenberry plants?**

- A. Set the plants as we suggest in the planting guide sent with all orders. Let the plants trail on the ground the first year. Then they can be tied to a trellis

and handled just as you would grapes.

**11. Q. Can I plant apple trees next to other fruit trees, such as Pears and Peaches?**

- A. The orchard can be mixed just as you want it, although many practical gardeners prefer to segregate the different kinds for convenience in spraying and general culture.

**12. Q. How close must my trees be for proper cross-pollination?**

- A. Individual trees not over 500-1000 feet apart will be satisfactorily cross pollinated, if the weather at blossoming time is warm enough for bees to be active. In solid blocks of closely planted trees, however, pollinizers should be provided every third or fourth row for best results.

**13. Q. Are Dwarf Apple Trees practical for commercial plantings?**

- A. From experimental data now becoming available, we have every reason to believe that dwarf trees will be a success in commercial orchards. However, until dwarf rootstocks are available in large numbers, large plantings will not be possible.

**14. Q. How can I tell if my soil is sufficiently acid for Blueberries?**

- A. Soil having an acidity testing between pH of 4.4 and 5.0 is considered best. If you cannot have your soil tested locally, send a sample to your State Experiment Station (see list on next page) and they will test it for you.

### THE CORTLAND APPLE

Consider the Cortland, so lucious to bake,  
Delicious in pies, fine for sauce, tarts and cake,  
Crisp sprightly in salads—remains snowy white,  
For lunches and munches—scrumptious to bite.  
Consider the Cortland—always a delight.

—E. Stuart Hubbard  
Poughkeepsie, N. Y.

**15. Q. Where is my State Experiment Station?**

Connecticut—New Haven  
 Delaware—Newark  
 Illinois—Urbana  
 Indiana—Lafayette  
 Kentucky—Lexington  
 Maine—Orono  
 Maryland—College Park  
 Massachusetts—Amherst  
 Michigan—East Lansing  
 Missouri—Columbia  
 New Hampshire—Durham

New Jer.—New Brunswick  
 New York—Geneva  
 North Carolina—Raleigh  
 Ohio—Wooster  
 Penn.—State College  
 Rhode Island—Kingston  
 Vermont—Burlington  
 Virginia—Blacksburg  
 W. Virginia—Morgantown  
 Wisconsin—Madison

**16. Q. Will the roses and shrubs I plant this Spring bloom this Summer?**

- A. The roses will bloom profusely all Summer. Be sure to trim them at planting time as we direct in the planting guide. Many shrubs will also bloom the first year, but some which form flowers only on two-year wood may not blossom until next year.

**17. Q. What can I do to prevent rabbit and mouse injury?**

- A. This is a hard question to answer. Fruit growers will tell you that "eternal vigilance" is the only sure control. We can make the following suggestions: Keep the area about 12 inches around each tree cultivated; put coal ashes or cinders at the base of the tree; and clean up any nearby trash or brush where rabbits and mice may harbor. Hunt the rabbits and destroy them, and poison mice according to recommendations available to you from your Experiment Station.

**18. Q. What shade tree will grow the fastest, provide suitable shade and look good?**

- A. Our recommendation is the Chinese Elm illustrated and described on page 31. Like many of the soft wood trees, it is, however, subject to splitting from heavy loads of ice and sleet, if the trees are not kept properly trimmed.

**19. Q. Are English Walnuts and Filberts hardy where I live?**

- A. When we have winters like those of 1933-34 and 1942-43, the trees might be injured, if they are not in a particularly sheltered area. Generally they will succeed where you find peach trees growing.

**20. Q. What size trees do you recommend?**

- A. We recommend the largest size and grade. After all, the first price paid for the tree is the cheapest part of the investment. However, all the trees and plants we offer are up to grade and A-1 in quality.

**21. Q. Why don't you sell trees older and larger than those listed in your catalogue?**

- A. Older and larger trees do not transplant so well and are difficult for the planter to handle. Also the cost per tree is higher than the average buyer cares to pay.

**22. Q. If I use a commercial nitrogenous fertilizer such as Nitrate of Soda or Sulphate of Ammonia, how much should I use?**

- A. Generally  $\frac{1}{4}$  lb. per year of age in the orchard. Example: A tree planted for four years would require 1 lb. Make application out under the drip of the branches, preferably in early Spring just as growth starts.

**23. Q. Will fruit trees grow where the soil is poorly drained?**

- A. No fruit tree will grow well where the soil is too wet. Cherry trees in particular will not tolerate the least amount of excess water. On the other hand, plum and prune are much more tolerant and will thrive where many other fruit trees would fail. We list them as follows in order of tolerance to wet soil: Prune, Plum, Pear, Apple, Quince, Peach, Apricot, Cherry.

**24. Q. Should I trim my trees when planting them?**

- A. It is most important that the pruning be done as we suggest in the planting guide sent with each order. Trees and plants set out in the Fall, however, should not be trimmed until early Spring.

**25. Q. Which kind of fruit trees are hardiest?**

- A. Apple, Sour Cherry, and Pear are most hardy. Peach, Apricot, and Sweet Cherry are least hardy.

**26. Q. Do you guarantee your trees and plants to grow?**

- A. We guarantee to deliver nursery stock in A-1 condition. Because there are so many conditions over which we or the purchaser have no control, such as adverse seasons, and which may affect the success or failure of the plants, we do not sell on a guaranteed growth basis. However, when losses are reported, we help on the loss. See our guarantee Page 2.

**27. Q. How deep should I plant my fruit trees and Raspberry bushes?**

- A. All stock should be planted slightly deeper than it stood in the nursery row. We explain the procedure by description and illustration in the planting guide mailed with your order acknowledgment.

**28. Q. My trees blossomed but no fruit was produced. What is the trouble?**

- A. The blossoms could have been killed by early frost or the fruit bearing part of the blossom could have been destroyed by Winter cold. Most failures of this kind, however, are due to lack of proper pollination. (See comments on pollination in our catalogue.)

**29. Q. How many Strawberries, Raspberries, Grapes, and Blueberries, and Asparagus should I plant for the average requirement for a family of five?**

- A. This will depend upon the family appetite for fruit.
- |                 |               |
|-----------------|---------------|
| Strawberries    | 25-200 Plants |
| Red Raspberries | 10-50 Plants  |
| Grapes          | 3-10 Plants   |
| Blueberries     | 3-10 Plants   |
| Asparagus       | 50-100 Plants |

**30. Q. I have several trees 15 years old. How can I keep them from getting too big?**

- A. After the trees have begun to fruit, you can hold them down by pruning the top heavily. Make a few large cuts always pruning to an outside lateral branch so as to reduce sucker growth.

**31. Q. Will the Strawberry and Raspberry plants I set this Spring produce fruit this year?**

- A. Ordinarily, they will blossom and fruit. However, to increase the bearing surface for a big crop, the next year it is best to remove the blossoms the first season, except from Everbearing varieties.

**32. Q. How can I protect my cherry crop from the birds?**

- A. Cover the tree with a cheese cloth netting. Write to Kendall Mills, Walpole, Mass. for further details.

**33. Q. Why don't you sell 2 year Peach trees?**

- A. Peach trees get large enough and are sufficiently well branched in one year, the way we grow them.

**34. Q. When will dwarf trees bear?**

- A. They should have a few fruits the second or third year. Production of blossoms or even fruit the first year is not unusual.

**35. Q. How can I keep borers out of my trees?**

- A. Peach tree borer can be controlled by chemical treatment. Write to the New York State Experiment Station, Geneva, N. Y. for their Free Circular No. 172 that gives complete directions. Apple tree borer is difficult to control but it is much less prevalent where young trees are regularly sprayed. See Question 6. If the tree is already infested the best you can do is to dig the borers out with a knife or wire.

### HOW TO FIGURE NUMBER OF PLANTS NEEDED PER ACRE.

Multiply the distance the plants are to be set apart by the width of the row. This result divided into 43,560 the number of square feet per acre is the number of trees or plants required for an acre.

#### PLANTING DISTANCES

| Variety             | Age of Bearing | Distance Apart | Number Per Acre |
|---------------------|----------------|----------------|-----------------|
| Apples, Standard    | 2 to 7 years   | 35x35 ft.      | 35              |
| Apples, Dwarf       | 2 years        | 15x15 ft.      | 193             |
| Apricots            | 3 years        | 20x20 ft.      | 108             |
| Asparagus, Field    | 2 years        | 2x5 ft.        | 4356            |
| Garden              | 2 years        | 15 in.x3 ft.   | 10249           |
| Blackberries        | 1 year         | 4x6 ft.        | 1815            |
| Blueberries         | 1 to 2 years   | 3x6 ft.        | 2420            |
| Boysenberry         | 1 year         | 3x4 ft.        | 3630            |
| Cherries, Sour      | 2 to 3 years   | 20x20 ft.      | 108             |
| Cherries, Sweet     | 3 to 4 years   | 25x25 ft.      | 69              |
| Currants            | 2 years        | 4x4 ft.        | 2722            |
| Grapes              | 2 years        | 6x8 ft.        | 907             |
| Peaches             | 2 to 3 years   | 20x20 ft.      | 108             |
| Pears, Standard     | 3 to 4 years   | 20x20 ft.      | 108             |
| Pears, Dwarf        | 2 years        | 15x15 ft.      | 193             |
| Plums               | 2 to 3 years   | 20x20 ft.      | 108             |
| Quinces             | 1 to 2 years   | 15x15 ft.      | 193             |
| Raspberries         | 1 to 2 years   | 3x6 ft.        | 2420            |
| Strawberries, Field | 1 year         | 1x3½ ft.       | 9900            |
| Garden              | 1 year         | 1x2 ft.        | 21780           |

## BEANS

Pkt. 10c, 1/4 lb. 16c, 1/2 lb. 27c, lb. 45c

**Bountiful.** Early, popular green podded Bean. Straw colored seed. Flat absolutely stringless pods, finest quality. 48 days.

**Burpee's Stringless.** Early, with dark green pods, 5 in. long. Sturdy, nearly round, stringless, fiberless. Seed coffee brown. 50 days.

**Golden Wax.** Rustproof; early; productive. Pods 4-4 1/2 in. long, very stout, straight or slightly curved and oval in form; flesh brittle, stringless, good quality; bright yellow. Seed white, much mottled brown. 52 days.

**Black Wax Pencil Pod.** Best dwarf black seeded variety. Early, very productive. Pods large 6 1/2 to 7 in. long, round nearly straight, strictly stringless, fiberless, fleshy, brittle. Clean yellow. 56 d.

**Kentucky Wonder or Old Homestead.** Most popular, green-podded, climbing or cornhill Bean; early and productive. Pods 8 to 9 in. long, nearly round, very slender, decidedly curved, slightly stringy. Tender. 65 days.

## LIMA BEANS

Pkt. 10c, 1/4 lb. 18c, 1/2 lb. 30c, lb. 50c.  
**Fordhook Bush.** Most excellent early and distinct variety and exceedingly popular with market gardeners. Pods about 5 in. long, containing 4 to 5 large, oval-shaped, very thick white beans. 75 days.

## BROCCOLI Pkt. 10c.

**Calabrese.** Best strain of the Italian green-sprouting Broccolis, which produce large, compact heads of bluish-green flower buds. Side shoots continue to grow after main head has been removed. 70 days.

## BEETS

Pkt. 10c, oz. 30c, 1/4 lb. 90c, 1/2 lb. \$1.50.  
**Detroit Dark Red.** Fine globe-shaped Beet of excellent quality. Very popular for canning. Deep ox-blood red. Sweet and tender. Small tap root. 68 days.

**Early Wonder.** Roots semi-globular with smooth, dark purplish red skin. Very small tap root. Medium size. Green tops. 58 days.

**Crosby's Egyptian.** First for early market. Roots a flattened globe shape; skin fairly dark red, flesh a trifle lighter in color and lightly zoned; tops large and tall. 60 days.

# Kelly's GARDEN SEEDS

PACKETS 10¢ EACH

Any 6 for 50¢ — Any 14 for \$1.00

Shipped Postpaid

## SWISS CHARD

Pkt. 10c, oz. 30c, 1/4 lb. 90c, 1/2 lb. \$1.50  
**Lucullus.** Pale green leaves crumpled and curled like Savoy Cabbage. The stiff-ribbed Chards are white and broad. 50 days.

## CABBAGE Pkt. 10c.

**Copenhagen Market.** Dependably early and uniform. Stem short, heads large, round and solid, with a few outer leaves of upright growth. 70 days.

**Danish Ballhead (Short Stem).** Heavy yielding strain, producing large heads, solid and of good color. Excellent for storage and kraut. 110 days.

## CARROTS

Pkt. 10c, 1/2 oz. 25c, oz. 40, 1/4 lb. \$1.30  
**Danver Half Long.** The best known second early half long sort; roots 6 to 8 in. long, tapering to a blunt point. Flesh deep orange, tender and good quality. 75 days.

**Chantenay Red Cored (Coreless).** Roots 5 to 6 in. long, 2 to 2 1/2 in. thick at the crown. Deep orange-red. A fine medium early, half long, stump-rooted Carrot. Core reddish orange. 70 days.

**Nantes Half Long.** Early variety, very sweet and tender. 1 inch to 1 1/2 thick the full length. 70 days.

## CUCUMBER

Pkt. 10c, oz. 30c, 1/4 lb. 90c, 1/2 lb. \$1.50.  
**A and C, White Spine.** Uniform, nearly cylindrical, very dark green, well rounded at ends. Highly desirable for shipping and market. 9 in. 68 days.

**Chicago Pickling or Westfield.** Medium green square ended. Early and largest of pickling type. 59 days.

**Long Green Improved.** A black spine type. 12 to 13 in. long. Flesh white and crisp. Dependable all purpose variety for home garden use. 68 days.

## SWEET CORN

Pkt. 10c, 1/4 lb. 15c, 1/2 lb. 25c, 1 lb. 40c  
**Golden Sunshine.** Very early Corn of the Golden Bantam type, maturing several days earlier than that variety. More dwarf. 75 days.

**Improved Golden Bantam.** Excellent mid-season yellow Corn with 8-in. ears and 10 to 14 rows. Very sweet and remains tender longer than regular Golden Bantam. 82 days.

## KOHL-RABI Pkt. 10c.

**Early White Vienna.** Large bulb produced on stem, is cooked like turnip. Sweet flavor. Sow early in spring, thin plants to 6 inches apart.

## ENDIVE Pkt. 10c.

**Green Curled.** Late variety. Tufty and full in center. Midrib white, thick, tender and fleshy. 90 days.

## LETTUCE

Pkt. 10c, 1/2 oz. 18c, oz. 30c, 1/4 lb. 90c.  
**Big Boston.** Excellent stock of the old favorite butter-head Lettuce.

**Grand Rapids.** One of the most popular loose-leaved sorts. Leaves are light green and frilled. Plant erect and compact. Excellent for early planting and forcing. 43 days.

**Iceberg.** Curled heading variety with light green leaves, tinged with brown. Crisp, sweet, white interior. Heads large and compact. 80 days.

**New York or Wonderful.** Widely used Lettuce. Solid, compact heads, very heavy. Outer leaves are deep green, heart blanches to a beautiful white. Tasty, crisp, delicious. Plants are deep rooting. Not recommended for forcing.  
**Simpson, Early Curled Silesia.** White seed. Fine home garden sort, with light green frilled leaves. Early, hardy and compact. Tender and sweet. 45 days.

## MUSKMELON

Pkt. 10c, oz. 30c.

**Bender's Surprise.** Salmon fleshed Melon. Very popular in New York State. Fruit medium to large, oval shaped, distinctly ribbed. 90 days.

**Honey Rock.** A favorite because of its deeply colored salmon flesh and its sweetness and flavor. Nearly round, Melons weigh 3 lbs., have light yellow skin, and a heavy, coarse, gray netting.

## ONION

Pkt. 10c, 1/2 oz. 35c, 1 oz. 60c.

**Yellow Globe Danvers.** Standard main crop variety, fine for storage. Bulbs large, round, yellow, firm, white fleshed. 115 days.

**Prizetaker.** Large, yellow Onion of very handsome globe shape. Flavor mild. Very productive. 105 days.

**Sweet Spanish.** Very large, bright golden yellow, globe-shaped Onions. Extremely uniform, medium-topped bulbs. Very mild. 108 days.

## PARSLEY Pkt. 10c.

**Champion Moss Curled.** Leaves uniform dark green color, finely cut and closely curled. 70 days.

## PARSNIP

Pkt. 10c, oz. 20c.

**Improved Hollow Crown or Guernsey.** Wonderful cropper. Long, white roots, tender, sugary. Roots 12 to 15 in. long, 3 in. thick at shoulder. Tapered and smooth. 95 days.

## PEAS

Pkt. 10c, 1/4 lb. 16c, 1/2 lb. 27c, lb. 45c.  
**Alaska.** Earliest Pea known. Small, round smooth Peas. Pods grow about 2 1/2 in. long. Straight and blunt at the end, light green. 55 days.

**Gradus.** A large podded, wrinkled variety for home garden and market use. Vines 3 to 3 1/2 ft. Pods about 4 in. long and contain many Peas. 60 days.

**Improved Telephone.** (Dark Podded Strain). Standard main crop Pea. Pods 4 1/2 to 5 1/2 in., are dark green and contain many well wrinkled Peas. 73 days.

**Little Marvel.** A productive dwarf sort, the vines growing 15 to 20 in. high. Dark green, plump, well filled pods. 62 days.

**Thomas Laxton.** Favorite early sort. Pods are dark colored, 3 1/2 in. long and contain many wrinkled and very sweet Peas. 62 days.

## PEPPER Pkt. 10c.

**California Wonder.** Smooth, uniform, deep green. 4-lobed fruit. Flesh thick, sweet and mild. 69 days.

**Harris Early Giant.** Heavy yielder, large peppers, very sweet. Early, best for New York State. 65 days.

## PUMPKIN

Pkt. 10c, oz. 15c, 1/4 lb. 45c, 1/2 lb. 75c.  
**Small Sugar or New England Pie.** Small orange-skinned, slightly ribbed. Finest quality flesh and most popular for pies. 108 days.

Continued on page 16F

BERT MALICK  
A Kelly Customer  
for 35 years says:

"This picture shows an orchard of the first trees I purchased of you about 35 years ago. All trees true-to-name and most of the original trees still producing heavily."

Mr Mallick has one of the largest and most successful orchards in the Northwestern Pennsylvania fruit growing section. Men like Bert Mallick appreciate good quality trees; their livelihood depends on the fruit these trees produce.

Ashland, Ore., Aug. 28, 1944  
Gentlemen:

I wish to express my appreciation for the fine shipment of fruit trees sent me this spring. I shall not hesitate to recommend your firm to anyone interested in quality trees.

Sincerely, Henry Metz

Kelly Bros., Inc., Dansville, N. Y.  
Gentlemen:

Just a few lines to let you know I received my order of trees and grapes today. There's only one thing to say and that's this—I'm only sorry I couldn't have ordered twice as many. They're really swell trees. Hope I can be instrumental in having some of my friends order some of the same trees. Thanks a million.

Sincerely,  
W. M. Anderson

Bellevue, Ky., Nov. 9, 1944

ELMER HILL  
South Hero, Vt.

"In the last 35 years I have planted ten thousand fruit trees—the greater part Kelly trees. About 25 years ago I sold three small farms with orchards which I had planted. These orchards are the main source of income for their owners. I expect to harvest 10,000 or 12,000 bushel of apples this fall from my Lake Orchard, the greater part McIntosh. I also grow cherries and plums.

Kelly's trees I am never afraid to recommend."

Kelly Brothers Nurseries  
Dear Sirs:

The Strawberries I received from you are still bearing and have had wonderful sets from them. I want to get some more plants to enlarge my bed.

Yours truly,  
Geo. F. Gilmour

ANTHONY GONDOLFO  
R. F. D. 1, Newburgh, N. Y.

"Most of the fruit trees we have planted during the past 20 years have been purchased from Kelly Bros. Yes sir, they grow and produce quality fruit. We like your trees."

Mr. Gondolfo is a member of the firm of Genco and Gondolfo, R. F. D. 1, Newburgh. These men with the help of their sons are doing a real job in producing apples, peaches, pears, and plums as well as growing many kinds of vegetables. Most of their crops are trucked to the New York City and Newark, N. J. markets.

Kelly Brothers  
Gentlemen:

The Latham Raspberry plants shipped September 28th reached me this A.M., and were in splendid condition. That has been my experience in all my dealings with Kelly Bros.

Yours truly,  
Captain Horton Mansfield

Philadelphia, Pa.  
September 30, 1944

Kelly Bros. Nurseries  
Gentlemen:

I received your letter saying that you could not fill my last order. It is clearly through your own doings that this has occurred.

Fifty years ago I used to visit Rochester, Geneva and other nursery centers to buy nursery stock. They were all good people to deal with and at times I made some heavy purchases, but in all my dealings I have never met any people who seemed so well to exemplify the essentials of sound and successful business as you people. You like and insist upon having good stock and you follow this up by also insisting that the receivers of your plants should treat them with that good sense and care which alone can insure a successful and profitable result. Following up these lines builds up a patronage that takes your entire output and clamors for more.

Today you show added good sense by not attempting to fill incoming orders with stock grown by others, but simply stop until another season. Please accept my best wishes and believe me.

Sincerely yours, James H. Bowditch

WHEN BUYING APPLES,  
ASK FOR THEM BY NAME.

FOR EVERY USE —

"THE FAVORITE SEVEN"

|                 | EATING                                      | PIE and SAUCE                            | SALAD                                 | BAKED  |

Do You Take Advantage of Your State Extension Service?

On page 16B you will find listed the location of your State Experiment Station. Your state provides a free service in supplying bulletins on all phases of fruit growing and agriculture in general. If you are considering a large planting the service would include an inspection of the land and specific recommendation. Contact your county agricultural agent—take advantage of the services available. We are always glad to help you with your problems—so feel free to write if you require additional information.

MORRIS COHN, Owner,  
Stanley Orchards Inc., Modena, N. Y.

"We have an acreage of 321 acres. Of this we have 225 acres in orchards. Of all our trees we have bought 90% of them from Kelly Bros. Nursery and have had the best results."

With the help of two energetic young sons, Mr. Cohn successfully carries on one of the largest fruit growing operations in Ulster County, N. Y.

HOWARD A. WHITE  
Fitchburg, Mass.

"I have always had good success with your trees and can highly recommend them."

Howard White has been buying and planting Kelly trees for over 25 years. Owner of extensive orchards, he is well known in his section for the quality fruit grown in his orchards.

Lynchburg, Va., March 16, 1944

Gentlemen:

The trees arrived on the 14th and I am highly pleased with them. It so happened an order for the same class of trees, priced much cheaper, arrived on the same day. It turns out yours are the cheaper as they are so much better in every respect. No more of the under-selling kind for me.

John H. Davis

CHARLES F. BECK  
Poughkeepsie, N. Y.

In a recent letter Mr. Beck says, "I may add a word of praise for your wonderful trees which I have been buying for the last eighteen years. They have always been satisfactory."

Everyone around Poughkeepsie, N. Y. knows Charley Beck by the quality fruit he produces. He has over 40 acres of apple orchard and 35 acres of producing peach orchard, selling a large proportion of his production direct to retail customers at his "Modern Roadside Market".

Kelly Brothers Nurseries, Dansville, N. Y.  
West Orange, N. J., March 16, 1944

Gentlemen:

May I take this opportunity of congratulating you on the quality of stock you are producing as was so well evidenced in that shipped to me this past Spring. Having spent the past 24 years appraising the condition of trees and diagnosing their ailments, I feel that I know good nursery materials when I see them and I was more than pleased with those received from you. Everything has grown splendidly.

Yours very truly,  
Herman S. Porter

Dear Sirs:

Will you please send us 2 of Stanley Prune? This is the total missing out of 500 we planted a year ago, so you know your trees stood well in spite of very dry conditions here.

Lewis W. Barton,  
Haddonfield, N. J.

## YOU NEED THIS BOOK!

WE RECOMMEND IT TO YOU.

Here are practical, detailed, specific instructions from one of the world's greatest authorities on fruits, who tells you:

1. How to choose the land for your fruit garden.
2. How many kinds and varieties to plant.
3. The correct distances between rows.
4. How to arrange the garden.
5. How to prepare the land.
6. How to graft, prune, spray, fertilize.
7. How to control orchard pests.

Eighteen kinds of fruit, with scores of varieties, are discussed, with the following details on each: **Life span; time required between planting and bearing; climatic requirements; harvesting—when to pick, how to pick, how to store.**

Dr. Hedrick is retired Director of the New York State Experiment Station, Geneva, New York.

PROFUSELY ILLUSTRATED **\$3.00** POSTPAID

Order this book today—direct from us. Shipment will be made at once.

### RADISH

**Pkt. 10c, oz. 20c, 1/4 lb. 55c, 1/2 lb 90c.**

**Crimson Giant.** Large, early maturing. Turnip-shaped Radish almost double the size of any of the other Turnip-shaped varieties. Grows quickly, has attractive crimson skin; flesh is pure white, fine flavor, firm, crisp. Never hollow or pithy.

**French Breakfast.** Oblong roots, scarlet color with a white tip. Half an inch thick by 1 1/2 inches long. 25 days.

**Early Scarlet White Tip.** Round and smooth. Color dull scarlet-red with one-third white area at bottom. Flesh white, crisp, and tender. 26 days.

**White Icicle.** Pure white, delicious, crisp flesh, always tender, juicy, and delicately snappy. Roots grow about 5 in. long, the shape of an icicle. Straight and free from side roots. 27 days.

### SPINACH

**Pkt. 10c, oz. 20c.**

**Bloomsdale Long Standing Savoy.** The standard long standing, dark green, crumpled leaf variety. Plant large, erect and sturdy. 42 days.

**Pkt. 10c, oz. 35c.**

**New Zealand.** Large, spreading plants with small, pointed leaves. Thrives in hot weather. Seeds large and hard-horned. 70 days.

### SQUASH

**Pkt. 10c, oz. 20c, 1/4 lb. 60c,**

**1/2 lb. \$1.00.**

**Chicago Warty Hubbard (Green).** Largest and best rough-skinned Hubbards. Large, heavily warted fruits of fine form, rich dark green color. Flesh golden yellow, dry and sweet. 105 days.

**Delicious (Green).** Medium size, top-shaped Winter sort, with dark green skin. Flesh very thick and bright yellow. 102 days.

**Giant Summer Crookneck.** Larger, later, more warted strain of Crookneck. Light yellow, flesh thick. 58 days.

**Table Queen.** Very early; extremely prolific. Dark green fruits pointed acorn shape. Flesh light yellow, bakes well with good flavor. 58 days.

### TOMATO

**Pkt. 10c, 1/2 oz. 35c.**

**Bonny Best.** Splendid large, second early Tomato. Slightly flattened globe shape. Smooth, solid, bright scarlet. 73 days.

**Earliana.** Excellent early, bright scarlet Tomato. Flat, smooth. 66 days.

**Pritchard.** Fusarium wilt-resistant. Fruit thick, globular. Color light scarlet. 76 days.

**Marglobe.** Produces medium size, smooth, deep, globe-shaped, meaty, bright red fruits in clusters of 5 to 7. Heavy producer. Resistant to Fusarium. 77 days.

### TURNIP

**Pkt. 10c, oz. 20c, 1/4 lb. 60c.**

**Purple Top Strap Leaf.** Early sort with purple shouldered white flat roots. Flesh white, fine grained and tender. 46 days.

**Purple Top White Globe.** A large, globe-shaped variety. Very smooth, upper part purple red, white below. 57 days.

### RUTA BAGA

**Pkt. 10c, oz. 20c, 1/4 lb. 60c.**

**American Purple Top.** Dependable variety. Roots large, globular, neck small. Flesh light yellow, firm, and of good texture. 90 days.

## VICTORY GARDEN COLLECTION \$1.79

A complete assortment of vegetables for an average size home garden! Supplying quantities of fresh vegetables for early and later Summer use. We have also included items most desirable for canning and pickling.

1/4 lb. Beans, Golden Wax; 1 lb. Peas, Thomas Laxton; 1/2 lb. Corn, Golden Bantam; and 1 pkt. each of the following: Radish, White Tip; Radish, Icicle; Lettuce, Big Boston; Lettuce, Early Curled; Beets, Detroit Dark Red; Carrots, Danvers Half Long; Cucumbers, White Spine; Onion, Yellow Globe; Salsify; Swiss Chard; Turnip, Purple Top; Squash, Crookneck; Spinach, Bloomsdale; Parsley.

## KELLY'S FLOWER SEEDS

**PACKETS 10¢ EACH**

**Any 6 for 50¢ — Any 14 for \$1.00**

**Shipped Postpaid**

**AGERATUM.** Dwarf, bushy border and edging plants. Flowers all season.

**ALYSSUM, Little Gem.** Low growing. White flowers, sweet scented. Excellent for borders.

**ASTERS, El Monte.** Largest Aster known. Fully double, wilt-resistant. Crimson.

**Giant Comet.** Mixed colors.

**Giant Branching.** Mixed colors.

**Queen of the Market.** Mixed.

**BACHELOR BUTTON.** Double flowers on long, graceful stems.

**BABY'S BREATH.** Attractive, small plants covered with tiny white blossoms.

**CALENDULA.** Free flowering Annual. Blooms until late Fall.

**Campfire.** Dark orange, scarlet sheen.

**Best Mixed.** Assortment of colors.

**CANDYTUFT.** Easily grown. May be sown early 1 ft. high.

**COLUMBINE (AQUILEGIA).** Perennial.

**COSMOS, Pinkie.** New. Clear rose-pink, large.

**Orange Flare.** Distinctive brilliant orange-colored blossoms. Plants bushy. Good for cutting. A "Gold Medal" winner.

**Early Flowering Mixed.** Large flowers. Blooms early.

**DELPHINIUM.** Perennial. Choice colors.

**DIANTHUS chinensis** (Old fashioned Pinks). Easy to grow. For cutting or borders.

**ENGLISH DAISY (Bellis).** Double flowers, for edging or low beds.

**FOXGLOVE (Digitalis).** Blossoms grow on long spikes.

**MARIGOLD, Double African.** Early. Large flowers.

**Gigantea, Sunset Giants.** Largest Marigold. Flowers loosely formed. Sweet fragrance.

**Harmony Hybrid Mixed.** Compact plants, 12 to 14 in. high. Wide range of lovely colors. Flowers have crested centers.

**Crown of Gold.** Golden orange flowers. Crested centers. Stays in bloom several weeks.

**MORNING GLORY, Heavenly Blue.**

White throat. Early.

**Giant Oriental.** Many colors.

**NASTURTIUMS, Tall Mixed.** Climbing. Mixture of colors.

**Dwarf Mixed.** Low-growing compact plants

**Golden Gleam.** Bush type, sweet-scented.

**PETUNIA, Howard Star.** Profusion of unique blossoms with five-pointed star in center.

**Rose King.** Bears freely large, uniform rosy flowers.

**Blue Bee.** Beautiful violet blue.

**Rosy Morn.** Low growing, covered with a mass of blossoms over a long season. Carmine-pink with white throat.

**PORTULACA.** Low growing annual. Small flowers. Light green, moss-like foliage.

**POPPIES.** Fine annual flowers.

**Shirley Mixed.** Semi-double, many shades.

**Double Flowered.** Large flowers. Plants tall.

**California** Brilliant flowers, excellent for cutting.

**PHLOX.** Blooms profusely all Summer. Annual mixed.

**SNAPDRAGON.** Large flowers on long stems. Many colors.

**SWEET PEAS, Spencer Mixed.** Favorite for size and beauty. Long stems. Strong vines.

**SWEET WILLIAM.** Perennial. Blooms early in Spring.

**VERBENA.** Consistent bloomer. Rare colors.

**ZINNIA, Dahlia-Flowered Mixed.** Makes a brilliant display from July to frost. Flowers last many days when cut. Sturdy, well branched plants.

**Fantasy Wildfire.** Shaggy flowers of bright scarlet. Strong growing, free flowering. 2 1/2 to 3 ft.

**Crown of Gold.** Pastel tints. Many pastel shades. Soft yellow and pink, old gold, apricot, pink, peach, salmon, buff.

**California Giants.** Flowers are large, flat and graceful with long stems. Plants grow 3 to 4 ft.

## KELLY'S QUALITY LAWN SEED

### KELLY'S "SPECIAL MIXTURE" LAWN SEED

This is our finest mixture of grass seed for lawns and it is blended from the very best quality seeds to give you a beautiful green lawn that will last.

**Lb. 70c, 5 lbs. \$3.35, 10 lbs. \$6.50, 50 lbs. \$31.50, 100 lbs. \$60.00.**

### KELLY'S "GREEN CARPET" LAWN SEED

A quality mixture of lawn grass seed suitable for the average lawn. Only the most desirable varieties are used in this mixture.

**Lb. 55c, 5 lbs. \$2.60, 10 lbs. \$5.00, 50 lbs. \$24.00, 100 lbs. \$45.00.**

### KELLY'S "SHADY SPOT" LAWN SEED

This mixture contains those varieties of grass seeds that grow and do the best in shady places. If you have trees in or around your lawn, use one of the above mixtures for the main part of your lawn and this Shady Spot mixture under the trees and shady sides of buildings.

**Lb. 70c, 5 lbs. \$3.35, 10 lbs. \$6.50, 50 lbs. \$31.50.**

**Amount of Seed to Use.** For new lawns sow at the rate of about 1 pound to 300 square feet. When re-seeding old lawns sow 1 pound to 600 square feet.

**ADVICE FOR FRUIT GROWERS**  
If you grow fruit or flowers, you will find the Rural New-Yorker interesting and helpful. This popular country journal places at your fingertips the wisdom and experience of many of the best known authorities in the horticultural field. Each issue contains interesting articles and practical advice by such prominent writers as Prof. H. B. Tukey, M. B. Cummings, D. F. Jones and other well known horticulturists. It will bring you, twice a month, reliable information in reference to fruit growing, gardening and all the other features of country life. It costs only \$1 for 3 years—a trivial price for such a wide fund of information. Your money will be returned if you are not satisfied after a three-month trial. Fill out the enclosed order blank and mail check, money order, or bill direct to The Rural New-Yorker, P. O. Box 639, Penn Terminal, New York 1, N. Y.

# ★ PATHFINDER

The Weekly News Magazine for the Whole Family. Now in its 52nd Year of Continuous Publication from Washington, the Nation's Capital. It's the One Weekly Magazine for Small Town America.

★ **HONEST** ★ **IMPARTIAL** ★ **ACCURATE**

You get every week the news of the world, of the nation and of communities like yours, written briefly in simple, everyday English. It's for the whole family. PATHFINDER, by focusing on the pertinent, meaningful events of today, projects the clearest picture of America's and the World's tomorrows. Our editors report the news while it is happening, and give the background story and significance. Folks have liked it for over 50 years. You will, too.

# Indian Summer

New, Everbearing Red Raspberry

## 10 CHOICE EVERBEARING PLANTS—\$2.95

The New Red Raspberry introduced by the New York State Experiment Station. Far superior to the other Everbearing varieties. The Summer crop ripens early in July; the Autumn crop starts early in September and continues until a severe frost. Plant is hardy and a vigorous grower, bears heavy crops. The berries are large, round, and dark red. Rich flavor of excellent quality equaled by few other berries.

**2 Year, Selected Plants: 10 for \$2.95, 25 for \$6.10, 50 for \$11.95, 100 for \$19.50**

### NEWBURGH

Is proving to be a very satisfactory berry for market purposes. The fruit is very large, very firm, and does not crumble. The color is a bright, attractive red; in keeping and shipping quality it has no superior. The plants are vigorous, hardy and very productive, the weight of the fruit is so great that the canes are often bent to the ground. The fruit is borne out in the open where it may be readily picked.

*July 4th-6th.*

### MARCY

**The berries are the largest of any variety.** They are long, firm, thick fleshed, medium sized, mild in flavor and of good quality. The plants are tall, vigorous, healthy and hardy. Sturdy canes which bear fruit out in the open for easy picking. Fine for market and home use.

*July 3rd-7th.*

### TAYLOR

This new red Raspberry promises to be the best of them all for New York and the northern states. Plants are vigorous, hardy, productive, tall growing and increase rapidly. Sturdy canes hold the berries well off the ground. The berries, bright attractive red, thick-fleshed, firm and of excellent quality.

*July 8th-12th.*

Indian Summer

Eldorado Blackberry

# Blackberries

Blackberries thrive best on fertile loam. The rows should be about 6 feet apart, with each plant approximately 2 feet apart in the row.

**Large No. 1 Plants—10 for \$1.80, 25 for \$3.30, 100 for \$9.75**

**ELDORADO.** Without doubt the most popular variety. Ideal for small garden or commercial planting. Plants are hardy and produce heavy crops. Strong, healthy grower resistant to disease. The berries are large, elongated, jet black, are soft; flesh juicy. Moderately firm and sweet. Ripens over a long period.

**ALFRED.** A new variety that is becoming prominent. Well liked for its large size, sweetness and ability to produce large crops annually. Ripens a few days ahead of Eldorado.

# Cultivated BLUEBERRIES

DELICIOUS—PROFITABLE  
VERY ORNAMENTAL

Blueberries require an acid soil which contains an abundance of peat moss or other partly decayed vegetable matter. If your soil is deficient in this material, a heavy application of peat, rotted sawdust, or other material should be made and worked into the top 6 inches of soil.

Plant 3 or 4 feet apart in rows 6 to 8 feet apart. Will produce satisfactorily for 50 years or more. For proper pollination, plant two or more varieties. We recommend the following:

|                     |        | 3-9    | 10-29  |
|---------------------|--------|--------|--------|
|                     | Each   | Each   | Each   |
| <b>LARGE SIZE</b>   |        |        |        |
| 12 to 18 in.....    | \$1.85 | \$1.55 | \$1.35 |
| <b>BEARING SIZE</b> |        |        |        |
| 18 to 24 in.....    | \$2.75 | \$2.35 | \$2.00 |

**CABOT** (Early). Bush is rather low and spreading, seldom reaching a height exceeding 4 ft. One of the earliest varieties, a good producer, excellent flavor, and a good shipper. Fruit is large, firm and attractive.

**RANCOCAS** (Midseason). Popular. Ripens about two weeks after Cabot. The bush is tall, vigorous and productive. The fruit is large, light blue, firm and attractive.

**RUBEL** (Late). Tall, well shaped bush, attractive appearance, excellent producer, good quality, slightly tart berry.

**JERSEY** (Late). Tall, well shaped bush, attractive appearance, excellent producer, large, good quality berry.

# BOYSENBERRY

## THE NEW MONEY-MAKER

**Known to bear nearly 6 tons per acre. Berries get to be 1½ to 2 inches long, 1 inch thick. Sweet, with few seeds**

The amazing new berry, a cross of the Blackberry, Raspberry and Loganberry, and is far more vigorous than any of its parents. It is immense in size and when you taste it you will agree that in flavor it stands supreme. The fruit when fully ripened will literally melt in your mouth. A distinctly different, very pleasant flavor, no core and very few seeds, make it a most delicious berry for eating fresh, for pies or for canning. If you want a real treat, here it is. It makes considerable horizontal growth as compared to its height; for easy picking plants should be trained on a fence or wires. Plants are strong, vigorous and quite hardy; however we advise covering with straw or hay in Winter in cold climates to avoid Winter injury. Select Plants.

**2 for 60c., 5 for \$1.20, 10 for \$1.80, 25 for \$3.30**

## New Thornless BOYSENBERRY

Canes smooth as velvet. Ripens 10 days to 2 weeks earlier than the common Boysenberry. The Thornless strain has retained all the good characters of its parent, including its rugged, thrifty growth. It's a pleasure to pick these large berries, without a chance of scratching your hands. Select Plants.

**2 for \$1.20, 5 for \$2.40, 10 for \$3.60, 25 for \$6.60**

Red Lake Currant

## Red Lake CURRANT

The new giant red Currant. The berries are a pleasure to pick, being large, dark red in color and on long, well filled branches. Very hardy. Ripens over a long season. Long stems facilitate harvesting. Supply limited.

**Select No. 1 Plants—75c. each, 3 for \$1.95, \$5.95 for 10**

*(We will be glad to quote on larger quantities)*

## Wilder CURRANT

**Strong, 2-Year Bushes—65c. each, 3 for \$1.65, \$4.95 per 10**

**WILDER.** Unsurpassed commercial sort; bunches and berries very large, bright attractive red. Hang on bushes well and of excellent quality; productive.

New  
Thornless  
Boysenberry

## GOOSEBERRIES DEWBERRY

**DOWNING.** A medium size, whitish green Gooseberry of good quality. Strong, upright grower and quite prolific. Midseason. July 10th to 15th.

**POORMAN.** Fruit is largest of any of the American Gooseberries. Attractive red color. Prefers a heavy type of soil. Bush very vigorous. Highest quality of any Gooseberry.

**Prices of Select Bushes—90c. each, 2 for \$1.75**

## Important!

**When ordering Currants or Gooseberry plants, it is necessary to have the following information:**

1. County and Township where planting is to be made.
2. Approximate distance from nearest stand of White Pine (Five Needled Pine). If you do not receive the Currants or Gooseberries with your order, you will know we are holding them for the permit, and if the permit is not granted refund will be mailed.

Of the Blackberry type, but produced on a trailing vine instead of an upright bush. The fruit is earlier, larger, attractive black, firm, and of very good quality. Plants are disease resistant. Excellent for canning. 1 year No. 1.

**6 for \$1.20, 10 for \$1.50, 25 for \$2.75**

Lucretia Dewberry

Concord

# For Quick Results

Grape Vines last a lifetime. Plant our selected plants. Guaranteed to be the finest plants grown. Easy to grow, adapted for a wide range of soil and climate. Prolific bearers. Fruit ideal for dessert, jelly, jam, or juice. Full planting instructions with each order.

**Prices, All Varieties, except as noted: Select, 2 yr. No. 1 Vines, 60c. each, 3 for \$1.65, 10 for \$4.50, 50 for \$15.50, 100 for \$24.75**

## CONCORD SEEDLESS .. *Black*

New, attractive garden novelty. No seeds, plants vigorous, hardy. Fruit small and of fine flavor. Good for pies. (Sept. 20). **1 yr. Selected Vines, \$1.15 each, 3 for \$3.25.**

**CACO (Red).** A new red Grape which is proving to be a great favorite. Berries very large and sweet. (Sept. 28-Oct. 3.)

## CONCORD THE FAVORITE

The leading commercial Grape. Color blue-black; bunches and berries large. Hardy, productive and an excellent shipper; succeeds over large area. Excellent for grape juice. (Sept. 25 to 30.)

## Golden Muscat

Wonderful new golden yellow Grape. For home use and roadside market it is one of the best. Possesses rich golden color and fine muscat aroma of European Muscat. Vine is vigorous, productive; the clusters are very large and compact. Berries are large, juicy, sweet and tender. (Oct. 5-10.)

**Selected, 1 yr. Vines, \$1.15 each, 3 for \$3.25**

## BUFFALO

### A NEW GRAPE

New, Early Black Grape, ripening first week in September. First time offered. Desirable for dessert and wine. Vine is a vigorous grower and very prolific. You'll like these sweet, juicy Grapes. Medium to large in size. Order a vine today. Supply limited.

# Plant Grapes

**AGAWAM (Red).** A large red Grape with rich aromatic flavor; a strong grower and very productive. (Oct. 1 to 5).

**DELAWARE (Red).** Bunches and berries small. Light red, unusually sweet and delicious. One of the best red varieties. (Sept. 20).

**NIAGARA (White).** The most popular white Grape. Bunches and berries extra large. Vigorous productive and a good keeper. (Sept. 25 to 30).

**PORTLAND (White).** Holds first place among Grapes as an early white variety. Vine is hardy, productive and healthy. Bunches and berries larger than any other white Grape. (Sept. 1 to 8).

**SENECA (White).** New. Fruit is of vinifera type. Best dessert variety. Flavor sweet, vinous and aromatic. Plant vigorous, productive. Fruit hangs until frost; keeps well in storage until December. (Sept. 5-10). **Selected 1 yr. vines, \$1.15 each, 3 for \$3.25.**

**SHERIDAN (Black).** An improved Concord with firmer, sweeter berries. Large and more compact. Sept. 27-Oct. 5.

**WORDEN (Black).** A large, early black Grape of fine quality. Berries and bunches large. (Sept. 20 to 25).

## New! Fredonia

The leading early black Grape. An introduction of the New York State Experiment Station. Plant is a strong, healthy grower; clusters medium in size; berries large and juicy. (Sept. 5 to 10.)

**VAN BUREN (Black).** Best new very early Grape; desirable for home and commercial planting. Resembles Concord but much sweeter. (Aug. 28 to Sept. 2). **Selected, 1 yr. vines, \$1.15 each, 3 for \$3.25.**

## BRONX SEEDLESS (Red)

### A GRAND NEW GRAPE

This new red Grape is the best seedless variety available today. Clusters are large, very long, attractive. Some of bearing vines produced clusters this year 12 inches long. Berries large, entirely seedless, firm, crisp. May be eaten with skin as California Grapes. Excellent in quality. Vine vigorous, productive. *Ripens September 20th.*

**1 yr. Selected Vines, \$1.75 each—Very limited supply  
One plant to a customer**

## Every Home Should Grow these Delicacies TENDER FRESH Asparagus

You'll be surprised how easy it is to grow Asparagus sufficient for a family of four or five. It is very healthful, rich in minerals and vitamins. Every garden should have some. Protect your families' health, and enjoy this tender, delicious vegetable. Room required is very small. Complete planting and cultural directions sent free with each order.

### MARY WASHINGTON—The Outstanding Variety

This is, without doubt, the best variety at this time. It is a very strong grower, stalk giant size, green color, rich and tender. In addition to being very productive it is rust resistant and a bed will last for years **Extra strong, 1 yr. plants, 25 for \$1.75, 50 for \$3.20, 100 for \$4.95, 500 for \$15.65**

## New Delicious McDonald RED RHUBARB

Introduced by McDonald College, Quebec, Canada. Considered the finest of all Rhubarb. A heavy producer. Giant size stalks 18-24 inches long, two to three times larger than the common Rhubarb. Sweeter and more tender. Use it all Spring and most of the Summer. Its red skin and white flesh makes the finest looking and best tasting Rhubarb sauce and pie you ever ate. Practically seedless, grown only from divisions.

**85c. each, 3 for \$2.25, 10 for \$6.50**

# Kelly's Strawberries

All Strawberries sent Postpaid  
or Express Prepaid

No Orders Accepted after May 1st

**PREMIER.** One of the most popular varieties. Bears over a long season producing a tremendous crop every year; berries are bright scarlet red of excellent flavor and quality. One of the first varieties to ripen.

**DORSETT.** An extra early self-pollenizing offspring of Premier; does well on poor soil; berries large, evenly matured, light bright red. Excellent for market or home use.

**FAIRFAX.** Early; a favorite for quality, flavor and productiveness. Large, firm berries throughout the fruiting season. Plant Fairfax for its superb flavor, large size and universal demand. One of the best varieties for home use.

Dorsett

Catskill

**CATSKILL.** Plants large, very vigorous, yield very heavy crops. Berries very large, slightly irregular in shape, moderately firm, dark red, but glossy and attractive, mild sub-acid and good quality.

**ROBINSON.** The elite of all June bearing varieties of Strawberries. Heavy yielder of large, brilliant red, more uniform in size than any other June bearing variety. Shape of berry more round than conical; 3 to 4 days later than Premier. The Robinson brought \$5.00 per crate on the Benton Harbor market, the world's largest growers market.

#### Prices of the above Plants:

25 plants \$1.75, 50 plants \$2.95, 100 plants \$3.95  
250 plants \$7.25

**NOTE**—All varieties we offer are perfect flowering and therefore can be planted alone. However to have Strawberries over a long season, it is best to plant more than one variety.

**SORRY**—Because of the shortage of Strawberry Plants we must limit the sale to 250 plants of a variety to a customer.

## Ra-pid-Gro

### A NEW EASY-TO-APPLY ALL-AROUND FERTILIZER

It is shipped in dry form and water is added by the customer to make the finest and most economical fertilizer, or plant food, that can be purchased. Twenty-two gallons of water should be added to each pound of RA-PID-GRO. Remember, one pound of the formula makes 176 pounds of liquid fertilizer. Trees and plants should be fed all during the growing season and this can be done by using RA-PID-GRO. It will not burn. Use RA-PID-GRO in transplanting all nursery stock.

# Climbing Vines

Hall's Honeysuckle Vine

## ALL KELLY VINES ARE READY TO FLOWER FIRST SEASON AFTER PLANTING

**AMPELOPSIS Veitchi (Boston Ivy).** Especially recommended for covering smooth concrete, brick or stone walls. Its blue berries are most attractive against the Fall colors of crimson and yellow. Will grow up to 40 ft. high and cover a large area of building surface. **75c. each, 3 for \$2.10.**

**BITTERSWEET (Celastrus orbiculatus).** This is the old-fashioned Winter bouquet variety that is native to most of the United States and is so common on the public markets around Thanksgiving time. Its large clusters of orange and crimson berries are in great demand. **60c. each, 3 for \$1.75.**

**CLEMATIS Jackmani.** This rapid grower is very generous with its very large single purple blooms from July to September. **85c. each, 3 for \$2.25.**

**CLEMATIS Mme. Ed. Andre.** A new variety which is a velvety brick red. Its crimson blooms put on a most attractive display from July to September. **\$1.00 each, 3 for \$2.65.**

**CLEMATIS Paniculata (Sweet Scented Clematis).** Comes at a time in the early Fall when there are not as many flowers available and is most welcome with its tiny star-shaped white flowers which are extremely fragrant. **65c. each, 3 for \$1.80.**

**EVERGREEN BITTERSWEET (Wintercreeper).** Will climb either brick or wood, but will not cling to stucco. The dark green, leathery leaves remain during the entire Winter and form a perfect background for its large red bittersweet berries. Besides its beauty as a climber, it can be kept trimmed into a most attractive evergreen shrub. No better ground cover for steep banks can be found. **75c. each, 2 for \$1.40.**

**HALL'S HONEYSUCKLE VINE.** Trumpet shaped flowers of white and gold are very fragrant and remain during the entire Summer until killed by the early Winter freezes. The foliage remains green during the Winter where it has protection of snow or mulch. An excellent ground cover for steep banks. Will also climb on trellis or tree trunk. **60c. each, 3 for \$1.65.**

**PURPLE WISTERIA.** One of the most popular and best beloved of all the vines. Will climb conductor pipes, wires or limbs with strong grip and its heavy clusters of purple blooms look like giant clusters of purple grapes hanging from it. The wood is so strong and vigorous that this vine can be trained into a small tree and while as a vine it blooms in May and June, it will bloom 2 or 3 times during the Summer when trained into tree form. Grafted plants, sure to bloom. **\$1.00 each, 2 for \$1.85.**

**SILVER LACE VINE (Fleeceflower).** The delicate fleecelike flower resembles the finest white lace. The light green foliage makes a perfect companion for such dainty flowers. Blooms heavily from Midsummer until Fall. Grows about 20 ft. the first season. **75c. each, 3 for \$2.00.**

**TRUMPETCREEPER (Bignonia radicans).** An old favorite that will stand the most severe climatic conditions. Will cling to any rough surface. The 6 in. long flowers at the ends of the branches are in clusters and are long, trumpet shaped and brilliant orange red. **60c. each, 3 for \$1.65.**

Silver Lace Vine

Purple Wisteria

**AMOR RIVER PRIVET.** Will grow to 10 ft. in height but may be pruned to any height and sheared to desired form. Branches are upright; foliage oval or oblong. Can be made very dense by pruning. Resembles California Privet in growth. Very hardy and almost an evergreen, holding its green leaves almost all Winter. Strong bushes. 12-18 in. **\$2.25 per 10, \$17.00 per 100; 18-24 in. \$2.50 per 10, \$20.00 per 100.**

**RED LEAF BARBERRY.** Very popular for specimen grouping and for edging taller plantings of shrubs or evergreens. Glossy purplish red leaves. Makes a brilliant colorful hedge. Special hedge size, 2-3 ft. **70c. each, \$3.25 for 5, 25 for \$15.00, 100 for \$47.50**

**BARBERRY Thunbergi.** The best all-purpose hedge; a shrub of marked excellence because of its bright green foliage which changes to brilliant colors in the Fall and its bright scarlet berries which are very conspicuous throughout the Winter. Their habit is dwarf and regular spreading. Grows well in the shade and extensively used in landscape work. It is very hardy and has never been known to Winterkill. It bears and shears well and makes a dense hedge. 15-18 in. **45c. each, \$3.50 per 10, \$30.00 per 100; 18-24 in. 55c. each, \$4.50 per 10, \$40.00 per 100**

**CALIFORNIA PRIVET.** The most popular Privet for hedges. It is upright and stiff in habit. Foliage oval and dark green. It is almost an evergreen. Not as hardy as the others in the extreme northern sections. Is most attractive when trimmed to a height of 2 to 5 ft., about the height of a fence. 18-24 in. **\$1.80 per 10, \$10.00 per 100; 2-3 ft. \$2.50 per 10, \$15.00 per 100.**

# KELLY'S

# Flowering SHRUBS

Althea

## ALTHEAS

Shamrock green leaves form backdrop for double Rose-like flowers. A most welcome sight in late Fall.

4 Colors: **Pink, Red, Purple and White** (6-8 ft.)

(Numbers in parenthesis indicate height at maturity but shrubs may be kept trimmed to desired height)

Prices, except  
as noted:

**Strong 2 yr., No. 1 Blooming Size—70c. each 3 for \$1.95**

## FLOWERING ALMOND

Graceful and dainty mistress of the lawn. Double pink rosettes in May. (4-5 ft.)

## BEAUTY BUSH

Cascades of pale pink during June. This new introduction resembles Weigela in blooms. Gracefully arching limbs give shrub added virtue. (4-5 ft.)

**18-24 in., 75c. each, 3 for \$2.15**

Red Leaved Barberry

## DEUTZIA

**Gracilis.** A charming little "must" for every garden. Slender twigs covered with white flowers in May and June. (18 in.)

**Pride of Rochester.** Vigorous, upright, tough and productive. Heavy covering of small white, Carnation-like flowers changing to red in center. (5-6 ft.)

## DAZZLING RED-LEAF BARBERRY

Identical with the green Barberry except for its startling, bright red leaves. Requires direct sunlight for best color. (3-4 ft.)

**2 yr., 2-3 ft. size  
70c. each 3 for \$1.95**

## NEW BUDDLEIAS

The late Summer Lilac. Resembles Lilac in shape and appearance. Long, slender spikes throughout late Summer and Fall. (4-5 ft.)

**Charming.** Long sprays of lavender pink. (Left.)

**Dubonnet.** Large sprays of wine-red. (Center.)

**Ile de France.** Violet purple and very fragrant. (Right.)

**Strong, 2 yr., 2 to 3 ft. blooming size, 65c. each, 3 for \$1.80, 10 for \$5.50**

## HYDRANGEA

**P. G.**

Tall and stately shrub. Bending over with top-heavy, cone-shaped flowers that are first white, then pink, and in late Fall, copper. A giant bouquet in itself. (4 ft.)

**2 yr., 2-3 ft. size  
70c. each 3 for \$1.95**

Hydrangea P. G.

# Flowering QUINCE

(CYDONIA JAPONICA)

An old-time garden favorite shrub. Scarlet red and shades of orange and pink flowers appearing early Spring. Popular for the shrub border or as a specimen plant. The fruit also makes excellent jelly and marmalade. 4-5 ft.

## TARTARIAN HONEYSUCKLE

Dainty, small, pink, trumpet-shaped blooms in May, followed by a profusion of red berries. Leaves have a bluish gray cast to them. Makes a large shrub excellent for screening and specimen planting. Grows in the poorest soil. (6-8 ft.)

## FORSYTHIA

As much a harbinger of Spring as the robin. The pure gold flowers in early Spring are produced before the leaves appear. We offer this plant in 2 varieties:

**Fortunei.** Which is a tall and stiffly upright grower. (6 ft.)

**Suspensa or Weeping Forsythia.** Is ideal for steep banks or as a specimen. Grows to about 5 ft. and then gracefully falls until it hits the ground like a golden waterfall. (5 ft.)

## HYDRANGEA

**Arborescens (Snowball Hydrangea).** This easy going shrub thrives everywhere and never fails to put on a display of showy pure white, Snowball-like flowers. (3 ft.)

## INDIAN CURRANT

Delicate little pink flowers against a reddish green foliage followed by coral colored berries that remain most of the Winter. Keep Winter birds near with abundance of these berries. See illustration page 28. (3-4 ft.)

## GOLD-FLAME HONEYSUCKLE

From June until freezing, this magnificent vine is covered with showy clusters of large, fragrant flowers, rosy-flame outside and gold inside. The attractive foliage, a rich blue-green, makes a perfect background for the brilliant flowers. Hardy, healthy, easy-to-grow it thrives North, South, East and West, in full sun or partial shade. It can be used in so many places—trellis, porch, pergola, fence, fine for covering bank or cave or can be trained as a shrub. **Our big, 2-year plants will bloom this Summer. 75c. each**

New Gold-flame Honeysuckle

Forsythia

Flowering Quince

## KERRIA

**Japanica.** Very slender, light green limbs covered with buttercup-like blooms of bright orange in July. (3-4 ft.) **18-24 in., 75c. each, 3 for \$2.15.**

## LILAC

**Common American.** The living landmarks; hardy and vigorous in any soil or climate; large clusters on Decoration Day. Offered in both white and purple. (6-8 ft.)

## PHILADELPHUS

**Coronarius.** Tall and exceptionally vigorous. Large, white sprays of blooms in May are most attractive. This is one of our most popular shrubs. (6-8 ft.)

## BLUE HYDRANGEA

Immense blooms of most charming BLUE throughout the Summer. The most preferred of all **Hydrangeas** due to its unusual form and color. Soil should be very acid to bring out the blue color. **A real novelty.**

**2 yr. plants, \$1.50 each**

Blue Hydrangea

## WEIGELA

**Bristol Ruby (Plant Patent No. 492).** As compared with Eva Rathke, Bristol Ruby is hardier, more vigorous,

and makes a thrifty, shapely plant. Color in effect is a soft ruby-red, shading to garnet-crimson, without a harsh tone. Blossoms somewhat larger than Eva Rathke, are distributed evenly throughout the plant with remarkable profusion through June and well into July, and continuing throughout the season. (4-5 ft.) 2-3 ft., **\$1.25 each.**

**Eva Rathke.** Is famous for its scarlet, trumpet-shaped blooms and for its hardiness. Blooms heavily in June and moderately during rest of the season. (3-5 ft.)

**Rosea.** Tall and vigorous with deep pink blooms all Summer. (5-6 ft.)

# SHRUBS *That Add Charm and Beauty to Your Home*

Indian Currant (See page 27)

## PHILADELPHUS *Virginalis*

The reliable old, sweet-scented Mockorange known and loved by all. Will tolerate smoke and other hard city conditions. (5-6 ft.).

18-24 in. 85c. each, 3 for \$2.25

## SNOWBALL *Viburnum opulus sterile*

The thoughts of home and friends are stimulated by the sight of the large, creamy white blossoms of the Snowball on Decoration Day. Will grow anywhere. (6-8 ft.)

## SNOWBERRY

Small pink flowers in June or July. Waxy white berries from August till Spring. Attractive dense foliage and berries attract birds. Grows under most adverse conditions. (4 ft.)

## SPIRAEA *Anthony Waterer*

With its low, rosy crimson flowers and narrow leaves is one of the most popular of the Spiraeas. Very low growing and hardy. Blossoms all Summer. (18-24 in.)

Spiraea, Anthony Waterer

## SPIRAEA *Thunbergi*

In late April its white flowers cover the very soft, tiny leaves and give the effect of a white waterfall. Extremely hardy. (3-4 ft.)

## SPIRAEA *Van Houttei*

Probably the best known of all the shrubs. Will tolerate shade and adverse city conditions. Grows in any soil. Completely covered with white flowers in June. (4-6 ft.)

2-3 ft. 50c. each, 3 for \$1.35,  
10 for \$4.25

Philadelphus Virginalis

# Hybrid French Lilacs

Large, 2-3 ft. Size—\$1.50 each, 3 for \$4.25

Our French Lilacs are budded on California Privet which causes them to bloom right away and keeps them dwarfed. Most all varieties are double and very fragrant. (4-5 ft.) We offer the following varieties:

**DESFONTAINES.** Flowers large, double, violet-blue, in very large open clusters. A conspicuous variety of excellent growth characteristics and a good clear color.

**EMILE LEMOINE.** Double well formed flowers of medium size in large open clusters. As near an approach to pure pink as is usually found in Lilacs.

**HUGO KOSTER.** Single, bluish-violet to light reddish-purple. flowers and clusters both very large. One of the best of the single Lilacs, distinct and attractive.

**LUDWIG SPAETH.** Flowers single, large, in large, well-filled clusters very deep maroon-red. Very free-blooming and of strong, thrifty growth. A very popular variety. Best all-around single dark lilac

**MME. CASIMIR PERIER.** Large, double creamy white flowers in large, well-filled clusters. A very satisfactory double white that may be depended upon to bloom freely each year.

**WALDECK-ROUSSEAU.** Double flowers of medium size in large, long many-branched clusters; deep violet, darker within than without. Very pleasing.

Hugo Koster

Mme. C. Perier

Ludwig Spaeth

# KELLY'S Choice Perennials

## HARDY PHLOX

Most popular of perennials, these lovely Phlox will enhance the beauty of your home grounds from Midsummer to late Fall. We offer this season a complete list of colors to make spots of brilliancy in the largest or smallest flower border.

50c. each, 3 for \$1.40

**Apollo.** Brilliant crimson. Medium height.

**Apple Blossom.** Large delicate pink trusses.

**Bridesmaid.** White with carmine eye.

**Enchantress.** Delicate soft pink.

**Ethel Pritchard.** Delightful French-mauve color.

**French Beauty.** Beautiful pure pink that glows and simmers in the sunlight.

**Painted Lady.** Silvery pink with salmon shadings and cherry red eye.

Enchantress — Apollo

## BLEEDINGHEART (Dicentra)

**EXIMIA (The Fringed Bleedingheart).** Dainty, rose-pink flowers in drooping racemes. Finely cut, fern-like foliage. May through August. Full shade or sun; 15 in. 50c. each, 3 for \$1.40.

Pink Cushion

### PLEASE NOTE

All Perennials are sent separately from the rest of your order. Postpaid. Early in May.

## Popular CUSHION MUMS

40c. each, 3 for \$1.10

Dwarf mounds, with wholesale quantities of double flowers from Midsummer until hard freezes. Entirely hardy and long-lived.

**BRONZE CUSHION.**

Coppery bronze flowers

**KING CUSHION**

Brick red flowers

**PINK CUSHION**

Bright pink flowers

**RED CUSHION**

Red flowers

**YELLOW CUSHION**

Bright golden yellow

**WHITE CUSHION**

White flowers

## HARDY CHRYSANTHEMUMS

Chrysanthemums! These lovely Fall blooms to prolong your flower season until the arrival of Winter. Our list of "Mums" is, this season, at its peak, and we have selected only those sorts which have seemed to us outstanding in beauty, hardiness and desirability. Try some of these gorgeous flowers and make yourself an Autumnal garden unsurpassed in your neighborhood.

**STRONG, FIELD-GROWN CLUMPS—50c. each, 3 for \$1.40**

**Burgundy.** Rich cerise crimson, acquiring deeper tones in the center as the bloom matures. Large, double flowers and carried on erect branching stems.

**Cydonia.** One of the brightest double flowers of a brilliant orange mahogany.

**Early Wonder (Pat. No. 490).** Flowers at first are a delicate pink blending to peachblossom pink when fully open.

**Milky Way.** An outstanding white. Hardy Chrysanthemum; flowers are of the semi-double informal type and carried in branchy sprays.

**Ruby Pompon.** Color is a ruby crimson, startlingly more rich and glowing than other Pompons. In full flower early October.

**September Gold.** Brilliant golden-yellow blossoms by mid-September, continuing until the season's end.

## DELPHINIUM Cliveden Beauty

**BELLADONNA IMPROVED (Cliveden Beauty).** A real improvement on this lovely Larkspur. Produces a profusion of graceful spikes of pale blue blooms which are much prized for cutting. They appear in June and again in September.

40c. each, 3 for \$1.10

Delphinium  
Cliveden Beauty

Chrysanthemum, Milky Way

# Shade and

(Numbers in parenthesis indicate approximate height at maturity)

Magnolia Soulangeana

## Special Magnolia Tree Offer

(SAUCER MAGNOLIA)

One of the most hardy of the Magnolias. Mammoth rose-colored blossoms resemble a cup and saucer of flower petals. Blooms in early Spring before the leaves appear. Blooms when very small, but will get to be about 10 feet tall. Makes an excellent specimen for lawn. (10-15 ft.)

2 to 3 ft. size, \$3.00 each

## Chinese Elm

FOR QUICK SHADE—(30-40) feet

A very rapid grower with small dense foliage. Resembles Norway Maple in shape. Excellent for tall hedge and windbreak. Because of its beauty and extremely rapid growth, the Chinese Elm has become the leading shade tree of America. It is planted in every state, standing intense cold and extreme heat extremely well. Under ordinary conditions, it makes excellent shade in five short years, as its average growth is 5 feet a year. It is by far the fastest growing hardwood shade tree.

6 to 8 ft. branched trees, \$2.00 each  
8 to 10 ft., \$2.75 each

Red Dogwood

## DOGWOODS

**Cornus florida rubra**

(RED-FLOWERING DOGWOOD)

This variety stands out among other ornamental trees as being one of the most desirable. Showy, rose-colored bracts (petals) and the deep red foliage in the Fall conspicuously distinguish it from the white Dogwoods, having the same ultimate height and good habits of growth. A combination of the red flowering with the white makes a beautiful grouping.

3 to 4 ft. trees, \$2.50

**Cornus florida**

(WHITE-FLOWERING DOGWOOD)

The rare beauty of Dogwood in Spring when it is white with bloom, or in Summer with its dark green foliage changing in the Fall to gorgeous reds, is hard to equal; it is one of the loveliest of trees. The spreading branches grow horizontally and slightly upward from the trunk, conspicuous flowers, appearing early in the Spring, are 3 to 3½ inches in diameter. A Dogwood makes a beautiful lawn or shrub border specimen, and is valuable for naturalizing where its native woods habitat can be copied.

3 to 4 ft. trees, \$1.75

Red Flowering Crab

White Dogwood

## LOMBARDY POPLAR

A few of these in your border planting will give the effect of a portion of the Old World right here in America. Makes an excellent windbreak and forms a perfect backdrop for lawn or garden. Tall, fast growing, spire-like trees. (40-60 ft.)

4 to 5 ft. 75c. each, 10 for \$6.00; 6 to 8 ft. trees, \$1.00 each, 10 for \$9.50

## PURPLE FRINGE

Blossoms like a purple puff of smoke that linger most of Summer. (10-12 ft.)

2 to 3 ft. 85c. each

## JUDAS TREE

Or REDBUD

This old variety of distinctly American origin greeted the first settlers from the edge of the forests. Fable tells us that when Judas betrayed Christ this tree immediately dripped all over with drops of blood. And that is the way it looks today when its blooms first come out. Later they turn into beautiful rose-purple flowers. Blossoms in April, before the leaves appear. (15-20 ft.)

3 to 5 ft. \$1.50 each

## CUT-LEAF WEeping BIRCH

This stately white trunked weeping tree has delicate, thread-like branchlets that weep in long strings to the ground. One of America's most beautiful shade trees. (20-30 ft.) 6 to 8 ft. \$3.00 each

## FLOWERING PLUM

(PRUNUS NEWPORT)

Small growing tree or large shrub retains its purple foliage during the entire season and has small red fruits in late Summer. Gives excellent foliage contrast in a shrub border. (8-10 ft.)

3 to 4 ft. size, \$1.50 each

## Red Flowering CRAB

← (MALUS FLORIBUNDA)

This small tree is round topped with single carmine buds that change to pink and then white. Very heavy blossomer with small fruit of blood red. Will stand severe Winters and drought. (15-20 ft.)

2 yr., 4 to 5 ft., \$1.50 each

# Ornamental Trees

Bechtel's Crab

## BECHTEL'S CRAB

This choice variety of Crab has endeared itself to many growers because of its spectacular flood of large, double rose-like flowers in Spring which completely hide the branches. Blooms every year. In general it resembles an Apple tree but is much smaller and finer branched. It grows in many locations and benefits from the same care given Apple trees. **2 to 3 ft. trees, \$1.25 each, 3 for \$3.00; 3 to 4 ft. \$1.50 each, 3 for \$4.00.**

## MOUNTAIN ASH (EUROPEAN)

Who has failed to admire the heavy drooping clusters of bright red berries against a background of soft green foliage. A most popular tree in America as it is in Europe. Used as bird bait in France. Most common in cemeteries of Wales. Witch dispeller in most of Europe and is the Rowantree of which the British sing. Will grow in any soil. (18-25 ft.)

**6 to 8 ft. size, \$2.75 each**

## Norway Maple

Many of our streets are lined with the Norway Maple, well liked for its pleasing and familiar symmetrical dome-shaped head and ability to grow under city conditions. Its dense leaves are rich green in color and held on the tree fully 2 weeks longer in the Fall than those of other Maples finally dropping without much change in color. One of the best trees for street planting or for a lawn specimen where good form and shade are needed. (60ft.)

## ROSE TREE of China (PRUNUS TRILOBA)

This variety is perhaps the most popular of the early flowering shrubs. It is a handsome, old-fashioned, shrub-like tree and should be included in every garden. The bright pink flowers stud every twig and branchlet in the Spring before the leaves come out. It will ultimately reach a height of 10 feet, becoming a rare specimen. Blooms in May. **2 to 3 ft. trees \$1.00 each.**

## AMERICAN ELM

This old reliable favorite of field and garden is one of nature's landmarks, because they withstand the ravages of time and storm. Vase-shaped top which is open sufficiently to allow the grass to grow well beneath it. (60-100 ft.) **6 to 8 ft. \$2.75 each, 2 for \$5.25.**

## WEeping WILLOW (Babylonica)

This native of China has been taken into the hearts of America because of its very graceful drooping branches that sweep the ground. This tree was chosen to mark the grave of Napoleon at St. Helena. (25-30 ft.) **4 to 5 ft. \$1.50, 6 to 8 ft. \$2.00 each.**

## PUSSY WILLOW (French)

No bouquet would be complete in early Spring without a few sprays of this Pussy Willow. Catkins are at least twice as large as those of the common American Willow. (10-12 ft.) **3 to 4 ft. 85c. each.**

## Other Choice MAPLE TREES

### DWARF REDLEAF MAPLE

A real Maple that grows no taller than 8 to 10 feet. Leaves are a startling crimson all Summer. Makes an excellent specimen for side yard or in formal garden. Gives a most satisfying effect when planted in front of or in an evergreen planting. Has best color when in full sun, but will tolerate moderate shade. (8-10 ft.)

**1½ to 2½ feet, \$4.50 each**

### SILVER LEAF MAPLE

Most rapid grower of all the Maples. Underside of leaves has a silvery cast and the bark is silvery. Large spreading tree. Sap good for sugar making. (60-70 ft.) **6 to 8 ft. \$2.00 each, 8 to 10 ft. \$2.50 each.**

### SCHWEDLER MAPLE

Very attractive, with well rounded head. Reddish purple foliage in early Spring changing to deep bronze in Fall. (60-70 ft.) **6 to 8 ft. \$3.50 each, 8 to 10 ft. \$4.50 each.**

### SUGAR MAPLE (HARD MAPLE)

While the bloom is not noticeable, the scarlet, orange and yellow foliage in the Fall more than make up for this lack. This tree is the source of most Maple Sugar. This rugged individual will stand time, storms and severe temperatures without flinching for a moment. (50-60 ft.) **6 to 8 ft. \$2.50 each, 8 to 10 ft. \$3.50 each.**

Norway Maple

Weeping Willow

# Old Glory

An Everbearing Strawberry with the fine qualities that make it one of the finest Strawberries for the home.

Set out in the Spring they will bear all Summer and up to severe frost. They will bear again in the Spring and again the next Fall. Berries are firm, deep red all the way through and "honey-sweet" in flavor. Does well in any location and is a variety suitable for the small garden as well as the large grower. Plant "Old Glory" this Spring and enjoy luscious berries over the longest possible season. Heaviest yielder of all Everbearers we have tested.
